The Allergy, Asthma & Immunology Research journal is an official publication of the Korean Academy of Asthma, Allergy and Clinical Immunology and the Korean Academy of Pediatric Allergy and Respiratory Disease and found in 2009. Published bimonthly (January, March, May, July, September, and November), the journal features cutting-edge original research, brief communications, and state-of-the-art reviews in the specialties of allergy, asthma, and immunology, including clinical and experimental studies and instructive case reports. Contemporary reviews summarize information on topics for researchers and physicians in the fields of allergy and immunology. Case reports highlight new aspects of clinical manifestations of allergic, immunologic, or respiratory diseases. Editorials and letters to the Editor explore controversial issues and encourage further discussion among physicians dealing with allergy, immunology, pediatric respirology, and related medical fields. AAIR also features topics in practice and management and recent advances in equipment and techniques for clinicians concerned with clinical manifestations of allergies and pediatric respiratory diseases.

Anatomy & Cell Biology (Anat Cell Biol) is an international forum for multi-perspective network of all fields of anatomy, particularly the field of Cell Biology based on Anatomy. The journal publishes papers ranging from the basic to the applied fields, and covers all levels of biological organizations in human bodies as well as in experimental model systems. The journal encourages submissions of microscopic studies with genetic, molecular and biochemical approaches. Anatomy & Cell Biology is of interest to anatomists, cell biologists, clinicians, and researchers working in biotechnology, as well. Manuscript submissions receive prompt attention from the Editor-in-Chief and undergo peer review with the supervision of the Journal’s Editorial Board. Anatomy & Cell Biology features 1) Original research articles, 2) Case reports and Technical reports, 3) Short communications, and 4) Review articles.

Archives of Pharmacal Research is an interdisciplinary journal devoted to the publication of original scientific research papers that aim to develop new drugs in the fields of medicinal chemistry, natural products, pharmacology, toxicology, pharmaceutics, microbiology, and basic biomedical sciences. The journal specifically aims to enhance scientific understanding in the fields. Thus, technical reports that document pharmacological and toxicological observations will not be generally accepted in the journal. Manuscripts will be considered for publication on the condition that the results reported are based on original research that has not been published elsewhere in any journal. Upon acceptance for publication of an article in Archives of Pharmacal Research, the author tacitly agrees to make available any materials used in the published experiments, or novel or natural products disclosed in the article that are not commercially available, so that other researchers may confirm the observations. In addition, natural product contribution must meet the following specific criteria: a) any natural extract must be defined, and appropriate information provided regarding the origin; and b) the author must be able to state that the material under study is endotoxin free. Please note that studies with crude extract and on chemical structures will not be accepted.

Asian Spine Journal (ASJ), the official journal of the Korean Society of Spine Surgery (KSSS), is an international peerreviewed journal which publishes articles related to basic and clinical researches of all spine fields quarterly in end of March, June, September and December. The journal aims to promote communications among spine surgeons especially in Asian countries regarding spine problems and to provide Asian spine surgeons more opportunities to publish their works in international journal. All manuscripts should be creative, informative and useful for the diagnosis and treatment of spine problems. Manuscripts regarding disease and treatment which shows more characteristic features in Asian people would be preferable. Every researcher who has interested in the aims and scope of Asian Spine Journal is encouraged to submit the papers from all over the world.

Diabetes & Metabolism Journal

Diabetes Metab J

http://e-dmj.org

It was launched in 1972 and had been published with a title of Journal of the Korean Diabetes Association (KDA) to 2007 (1015-6461). Its title from 2008 to 2010 was Korean Diabetes Journal (pISSN 1976-9180, eISSN 2093-2650). Diabetes & Metabolism Journal (DMJ) is a new title from 2011, volume 35. The DMJ is the official journal of KDA. It is published bimonthly, with articles in English accepted through the process of peer review. The aims of the Journal are to contribute to the cure of and education about diabetes mellitus and the advancement of diabetology through the sharing of scientific information on the latest developments in diabetology among members of KDA and other international societies. The Journal publishes articles on basic and clinical studies, focusing on areas such as metabolism, epidemiology, pathogenesis, complications, and treatments relevant to diabetes mellitus. It also publishes articles covering obesity and cardiovascular disease. Articles on translational research and timely issues including ubiquitous care or new technology in the management of diabetes and metabolic disorders are welcome. Priority is given to studies conducted with Asian diabetic subjects. The editorial board invites articles from international research or clinical study groups.

Endocrinology and Metabolism is the official journal of the Korean Endocrine Society and is published quarterly. The aims of this journal are to set higher standards of medical service by providing the chances of mutual discussion to basic researchers, clinical researchers, translational researchers and clinicians in Korea and the Asia-Pacific region on the new findings in endocrinology and metabolism field from basic, clinical and translational aspects, and to contribute to the basic and clinical progress in endocrinology and metabolism field by showing the possibility for further investigation. This journal covers results from molecular biology, cell biology, animal physiology, and clinical trial in endocrinology and metabolism field, and includes the results from the diseases of pituitary, thyroid, parathyroid, adrenal, gonad, diabetes mellitus, osteoporosis and other endocrine diseases. This journal also covers the results from the studies in pediatrics, adults, aging and postmenopausal period. This journal consists of review articles, editorials, original articles, case reports, images in Endocrinology, letters to the editor, correspondences, and is written in English or Korean. Articles written in English should be accompanied with abstracts in Korean, and articles written in Korean should be accompanied with abstracts in English. This journal permits submission from the members in Korea and the Asia-Pacific region and non-members in other region are also welcome in submitting their manuscripts. Acceptance for publication of submitted manuscript will be decided by the editor and on the peer-reviewer basis. Key words should be included with the terminology listed in medical subject headings (MeSH) list of Index Medicus. This journal is published on-line in the journal’s home page electrically (www.enm-kes.org).

Environmental Health and Toxicology
Environ Health Toxicol

http://www.e-eht.org

Environmental Health and Toxicology (EHT) is an open access, peer-reviewed, online journal that receives manuscripts on the fields of research, policy, and teaching of environmental health and toxicology. The journal is published online and includes original articles, reviews, meeting reports, brief reports, case reports, investigation reports, special topics, editorials, and letters. EHT is formerly known as Korean Journal of Environmental Toxicology and has a 25 year history of publication in the field of environmental toxicology in Eastern Asia with peer review process. With enforcement of the field of health, it was reborn as EHT since early 2010. EHT considers manuscripts that have not been published previously (except as an abstract), and are not being considered for publication elsewhere. A paper presented at a scientific meeting may be considered if it has not been published in full in a proceedings or similar publication. Any closely related manuscript either published, in press, or under review must be sent via E-mail: to the journal office at the time of the submission to EHT. This will allow for a full and fair evaluation of the independent contribution of the submitted paper. Editorial board can request for a review article according to its decision.

The Health Communication is an official journal of the Korean Academy on Communication in Healthcare. The journal provides a forum for the study of communication between patients and providers in a variety of medical and health service contexts. It represents our endeavor to improve the quality of health services and patient satisfaction through the investigation of more effective communication channels and methods. The journal welcomes authoritative, innovative scholarship from medicine, health, social sciences, and arts and humanities. The journal publishes empirical and theoretical contributions biannually in the form of original research articles and reports, review articles, and editorials in Korean and in English. It invites contributions using quantitative and/or qualitative methods on concepts of health and medical communication, patients’ understandings on illness and medicine, patient-provider relationships and rapport, providers’ communication with patients, providers’ communication competences and abilities in medical and health contexts, and other related topics. The Health Communication employs the practice of anonymous peer review. Full texts of the original research articles and editorials published in the journal can be downloaded from the website of the Korean Academy on Communication in Healthcare (http://www.healthcommunication.or.kr/).

As the official journal owned and published by the Korean Association of Immunologists (KIA), Immune Network publishes novel peer-reviewed original findings and review articles in all areas of basic and clinical immunology. Areas covered include, but are not limited to, cellular immunology and immune regulation, molecular and structural immunology, innate immunity and inflammation, autoimmunity, transplantation and tumor immunology, and immunotherapy. Priority is given to studies that provide fundamental insight into the network of host immune responses. Major criteria for acceptance are quality, originality, clarity, and conciseness.

International Neurourology Journal is the official journal of the Korean Continence Society, being published four times a year. Supplementary issues may be published. Its official abbreviation is 'Int Neurourol J.' It was launched in 1997. The title of the first volume was Journal of the Korean Continence Society (pISSN 1598-186X). The journal title was changed to International Neurourology Journal from Volume 14 Number 1, 2010. It publishes original articles, case reports, and review articles covering investigation of causes, diagnoses, and treatments associated with basic and clinical medicine about nervous system of genitourinary system and pelvic organ, such as urinary tract dysfunction, bowel dysfunction, nursing in this field. Only articles that are scientifically identified and theoretically, originally developed as the results of new, significant, and recent studying on the medical information and knowledge associated with the above-mentioned fields and that were conducted ethically and complied with policies of management of the Korean Continence Society can be published in this Journal. The types of manuscripts include original articles, case reports, review articles, and articles invited by the Editorial Board. Int Neurouol J (INJ) contains 9 sections: Basic research, Benign prostate hyperplasia, Lower urinary tract symptoms, Female urology, Sexual dysfunction, Pelvic floor function and rehabilitation, Urinary incontinence, Nursing, Voiding dysfunction, and Urinary and fecal continence. Articles that have been already published or submitted for publication elsewhere cannot be submitted to this journal, and articles that have been published in this journal cannot be published elsewhere without permission. The Korean Continence Society has all the copyrights of all the manuscripts that have been submitted and permitted for publication in this Journal.

The Journal of Acupuncture and Meridian Studies is a quarterly, peer-reviewed journal featuring high-quality studies related to basic and clinical acupuncture and meridian research. It also includes new paradigm of integrative research, covering East, West and traditional modern medicine. Manuscripts should fall into one of the categories: topical review, original research paper, brief report and case report. The areas covered by the journal include: basic and clinical research on acupuncture and meridian studies; integrative biomedical research; and health science in general and other modalities. The subjects covered by the journal include: acupressure, electroacupuncture, laser therapy, pharmacopuncture (herbal acupuncture, acupoint injection), herbology (herbal medicine), veterinary acupuncture, and related animal studies. Articles on general health science and other modalities, such as anthroposophy, homeopathy, ayurveda, bioelectromagnetic therapy, chiropractic, neural therapy and meditation, may also be eligible for consideration if the articles are related to acupuncture and meridian studies.

Journal of Agricultural Medicine and Community Health, JAMCH, is an official publication of Korean Society for Agricultural Medicine and Community Health and serves as a medium for communication among health scientists and professionals in practice, educational, research, and policy settings. JAMCH deals with original papers, reviews and case studies related to health care service in rural community in specific. The journal invites original research encompassing evaluations of model and demonstration projects to improve rural health, statistical comparisons of rural and urban differences, and mathematical models examining the use of health care services by rural residents. Innovative practice techniques designed for rural environment and recommendations and guidelines for the delivery of rural health care services is also welcomed. Other subjects are also invited including innovative practice techniques, rural public policy, case studies and education.

The Journal of Breast Cancer is the official journal of the Korean Breast Cancer Society, which is issued quarterly with open access. The journal aims to provide a forum for the academic communication between medical doctors, basic science researchers, and health care professionals to be interested in breast cancer. To get this aim, we publish original investigations, review articles, brief communications including case reports, editorial opinions on the topics of importance to breast cancer, and welcome new research findings and epidemiological studies, especially when they contain a regional data to grab the international reader's interest. Although the journal is mainly dealing with the issues of breast cancer, rare cases among benign breast diseases or evidence-based scientifically written articles providing useful information for clinical practice can be published as well.

The Journal of Gastric Cancer (J Gastric Cancer) is an international peer-reviewed journal with a broad readership. The journal considers high quality basic, clinical and translational researches on gastric neoplasms. J Gastric Cancer publishes original articles on pathophysiology, molecular oncology, diagnosis, treatment, and prevention of gastric cancer as well as articles on dietary control and improving the quality of life for gastric cancer patients. Publications include case reports, review articles, how I do it articles, editorials, and letters to the editor. All submission reviews and decisions are processed online (www.jgconline.org), which substantially reduces the review time and thus shortens overall publication time. Please refer to “instructions to authors” for detailed information regarding submissions. J Gastric Cancer is published quarterly, and it accepts only the articles with high academic value after a thorough review. This journal aims at publishing recent research articles that provide new information necessary for treating gastric cancer, thereby contributing to the improvement of public health.

Journal of Korean Academy of Nursing

J Korean Acad Nurs

http://www.jkan.or.kr

Journal of Korean Academy of Nursing is a peer-reviewed, research journal devoted to publication of a wide range of research that will inform the practice of nursing. The editors invite creative research papers on nursing theory, practice, and education. This journal is published 6 times per year (February, April, June, August, October, and December). The papers are originally published in Korean but abstracts, tables, figure and reference are in English. We are also publishing December issue in English. Journal of Korean Academy of Nursing is published using an open access publication model. The journal welcomes original research on nursing intervention and health policies using appropriate research methods. Comprehensive review, concept analysis, and methodological papers are also welcome. The journal has a distinguished editorial board with extensive academic qualifications, ensuring that the journal maintains high scientific standards and has a broad international coverage.

Aims: The Journal of Pharmacopuncture is an international, peerreviewed open access journal published in English. Published by the Korean Pharmacopuncture Institute (KPI), it has provided high-quality papers quarterly since 1997. It also aims to publish evidence-based, scientific research papers in the field through strict review process by a panel of experts. As an international journal, the Journal of Pharmacopuncture aims to present major advances and new developments contributing to the development of complementary and alternative medicine, with a special focus on pharmacology, acupuncture and a combination of pharmacology and acupuncture. The journal is dedicated to disseminating information and fostering debate on related issues, better informing the general public and experts. In addition, the journal requires high standards of research ethics to maintain the integrity of science. The official title of the journal is 'Journal of Pharmacopuncture' and the abbreviated title is 'Pharmacopuncture'. For submission, see the details at http://www.journal.ac.

Scope: This journal covers a wide range of basic and clinical science research relevant to pharmacology, acupuncture studies and pharmacopuncture studies. The subjects are mainly divided into three categories: pharmacology (herbal medicine, Sasang constitutional medicine, herbal formula, naturopathy, etc.), acupuncture studies (acupressure, electroacupuncture, laser acupuncture, moxibustion, cupping, etc.), and pharmacopuncture studies (aqua-acupuncture, meridian pharmacopuncture, eightprinciple pharmacopuncture, animal-based pharmacopuncture, mountain ginseng pharmacopuncture, bee venom therapy, needle embedding therapy, implant therapy, etc.). Other categories include chuna treatment, veterinary acupuncture, related animal studies, cancer of alternative medicine, etc. Broader topical coverage on acupuncture effects, medical plants used in traditional and alternative medicine, pharmacological action and other related modalities, such as anthroposophy, homeopathy, ayurveda, bioelectromagnetic therapy, chiropractic, neural therapy and meditation can be considered within the journal’s scope if based on acupoints and meridians. Submission is encouraged of original articles, review articles, systematic reviews, case reports, brief reports, opinions, commentaries, medical lectures, letter to the editors, photoessays, technical notes, and book reviews.

The Korean Ophthalmological Society (KOS), whose members are composed of Korean board-certified ophthalmologists, ophthalmology residents, and physicians practicing ophthalmology-related medical care, publishes the journal to promote advances in ophthalmology, mutual friendship among the members of the society, and the members' commitment to continued research and development. The first issue of JKOS was published in 1958. The journal is the official journal of KOS and each month publishes articles relating to ocular diseases and basic research in ophthalmology. Submitted papers are peer-reviewed and evaluated before publication by experienced specialists in each subspecialty. The monthly journal is distributed to members of KOS, medical schools, libraries, and many other institutions at home and abroad to promote the development of Korean ophthalmology and academic exchanges among KOS members as well as international society members. The ultimate goal of JKOS is to make contributions to the well-being of Korean people and the human race in general by improving the science and technology in ophthalmology. The full text is available from KoreaMed Synapse and the journal's own homepage.

Journal of the Korean Society of Coloproctology (JKSCP) is an official publication of the Korean Society of Coloproctology to provide and in-depth development of coloproctology in Korea. The journal publishes special articles on clinical and basic studies pertaining to physiology, epidemiology, pathophysiology or treatment of the diseases which are originated from the lower digestive system such as colon, rectum, anus and bowel system. The editorial board calls for the articles that originate from worldwide research or clinical study groups and the publication is determined by the editors and reviewers who are the experts in the specific field of coloproctology. The categories of manuscripts are original articles, case reports, reviews and letters to the editor. The journal is published bimonthly and distributed to the members of the Korean Society of Coloproctology, medical school, libraries and related institutes to pursue the academic advancement in coloproctology and to promote an active communication between the members and international societies of coloproctology. Eventually, the journal aims to contribute to cure of the diseases of coloproctology and improvement of public health.

The Korean Journal of Clinical Microbiology (KJCM) is a periodic journal published by the Korean Society of Clinical Microbiology. It is devoted to the communication of new knowledge concerning the microbiological aspects of human and zoonotic infections, especially their etiological agents and diagnosis. The scope of this publication is confined to the isolation, identification, and epidemiology of infecting microorganisms, including bacteria, viruses, fungi, and parasites. Antimicrobial agents and their in vitro susceptibility testings are also included. The KJCM excludes manuscripts related to environmental and industrial microorganisms, and manuscripts related to other areas will be considered individually by the editorial board of the KJCM.

The Korean Journal of Gastroenterology is an official publication of the Korean Society of Gastroenterology to provide broad and in-depth development of gastroenterology in Korea. The Journal publishes special articles on clinical and basic studies pertaining to physiology, epidemiology, pathophysiology or treatment of the diseases which are originated from the digestive system such as esophagus, stomach, small bowel, colon, pancreas and hepatobiliary system. The editorial board calls for the articles that originate from worldwide research or clinical study groups and the publication is determined by the editors and reviewers who are the experts in the specific field of gastroenterology. The categories of manuscripts are original articles, case reports, reviews and letters to the Editor. The Journal is published monthly and distributed to members of the Korean Society of Gastroenterology, medical schools, libraries and related institutes to pursue the academic advancement in gastroenterology and to promote an active communication between the members and international societies of gastroenterology. Eventually, the journal aims to contribute to cure of the gastrointestinal diseases and improvement of public health.

The Korean Journal of Hospice and Palliative Care (Korean J Hosp Palliat Care) is the official publication of Korean Society for Hospice and Palliative Care. The journal publishes special articles on clinical and basic studies pertaining to pathophysiology, epidemiology, palliative treatment and care, education, and policy which originate from hospice and palliative care. Each submission to the Journal, published four times a year, is examined by multidisciplinary area specialists before being considered for publication by the editorial board. Manuscripts include the original articles, case reports, reviews, and news. The Journal is distributed to the members of the Society, medical schools and hospitals, nursing schools, libraries, and similarly relevant institutions. The journal seeks to promote a climate of active communication among the members of both the Society and the International Association for Hospice & Palliative Care. It also seeks to advance our hospice and palliative care knowledge in all respects. Our ultimate goal is to improve the quality of life for those who are near death due to terminal illnesses as well as their families.

The Korean Journal of Internal Medicine is an international medical journal published in English by the Korean Association of Internal Medicine. The Journal publishes peer reviewed original articles, reviews, and editorials on all aspects of medicine, including clinical investigations and basic research. Both human and experimental animal studies are welcome, as are new findings on the epidemiology, pathogenesis, diagnosis, and treatment of diseases. Case reports will be published only in exceptional circumstances, when they illustrate a rare occurrence of clinical importance. Letters to the editor are encouraged for specific comments on published articles and general viewpoints.

The Korean Journal of Medicine is the official journal of The Korean Association of Internal Medicine (KAIM), and is published monthly with supplements in Korean with English abstracts. Its aims are to contribute to the cure of diseases and the improvement of human health through the sharing of scientific information on the latest developments in internal medicine among members and other international societies. Various diseases are the main causes of death and decrease the quality of life for humans in the world. Research in the treatment and prevention of these diseases is urgent in Korea as in other countries. To foster and promote such research, the journal publishes original articles, case reports, reviews, editorials, specialized serial articles and provides a discussion forum through Letters to the Editor. Its focus covers clinical and basic research which bridges the laboratory and clinical practice in the field of internal medicine.

The Korean Journal of Ophthalmology is a bimonthly, peer-reviewed journal, which publishes original reports of basic and clinical research in all fields of ophthalmology and visual science. The ultimate goal of the Korean Journal of Ophthalmology is to contribute to global health and well-being by improving the science and technology of ophthalmology and clarifying the distinctions between different regions of the world. Main features include clinical observations, new diagnostic methods, surgical techniques, treatment methods and results of clinical trials. Anyone who agrees with our aims and scope is eligible to submit a manuscript. The journal is distributed to the members of the Korean Ophthalmological Society, medical libraries, and many other institutions worldwide to promote the development of ophthalmology and academic exchanges among the Korean Ophthalmological Society members as well as international colleagues.

The aim of the Korean Journal of Oral and Maxillofacial Pathology is to publish manuscripts of high scientific quality representing original clinical, diagnostic or experimental work in oral pathology and biology. Papers bring new knowledge and observations from the application of techniques within the spheres of light and electron microscopy, tissue and organ culture, immunology, histochemistry and immunohistochemistry, microbiology, genetics, biochemistry and molecular biology. The Korean Journal of Oral and Maxillofacial Pathology is published six times (end of February, April, June, August, October, December). Review papers on topical and relevant subjects will receive a high priority and articles requiring rapid publication because of their significance and timeliness will be included as "Short communications" not exceeding two printed pages. All submitted manuscripts falling within the overall scope of the Journal will be assessed by at least two suitably qualified referees. This journal is available online at KAOMP. Visit www.kaomp.com to search the articles and register for table of contents E-mail: alerts.

The Korean Journal of Pathology provides a forum for the understanding of the pathologic processes and evaluation of new and existing diagnostic applications of scientific advances and clinical pathologic correlations; fostering the acquisition and maintenance of up-to-date information to ensure high standards of practice; and, encouraging the publication of new information. The Korean Journal of Pathology provides important and up-to-date informations on the pathology and cytopathology. The coverage has a wide scope, encompassing histologic and cytologic diagnostic processes, clinicopathologic correlations, illustrative cases, molecular biology, and experimental pathology. The categories of manuscript include original articles, review articles, case reports, short case reports, and letters to the editor. All of the submitted papers are thoroughly reviewed by two or more reviewers. The journal observes the Good Publication Practice Guidelines for Medical Journals by Korean Association of Medical Journal Editors.

Korean Journal of Pediatrics

Korean Journal of Pediatrics is an international, peer-reviewed monthly journal of medicine published in English. It is the official publication of The Korean Pediatric Society. Korean J Pediatr covers clinical and research works relevant to all aspects of child healthcare. The journal aims to serve pediatricians through the prompt publication of significant advances in any field of pediatrics and to rapidly disseminate recently updated knowledge to the public. Additionally, it will initiate dynamic, international, academic discussions concerning the major topics related to pediatrics. Manuscripts are categorized as current opinions, review articles, original articles, case reports, and letters to the editor.

Korean J Phys Anthropol

http://www.jops.co.kr/ojms/kpaa

Korean Journal of Physical Anthropologists (Korean J Phys Anthropol) is an international forum for multi-perspective network of all fields of Physical Anthropology, Clinical Anatomy, Forensic Science, Paleoanthropology. The journal publishes papers ranging from the basic to the applied fields, and covers all levels of biological organizations in human bodies as well as in experimental model systems. The journal encourages submissions of various studies such as paleoanthropology, gross anatomy, clinical anatomy, paleopathology, histology as well as physical anthropology. Korean Journal of Physical Anthropologists is of interest to physical anthropologist, paleopathologist, forensic scientist, anatomist, cell biologist, clinicians, and researchers working in biotechnology, as well. Manuscript submissions receive prompt attention from the Editor-in-Chief and undergo peer review with the supervision of the Journal’s Editorial Board. Korean Journal of Physical Anthropologists features 1) Original research articles, 2) Case reports and Technical reports, 3) Short communications and 4) Review articles.

The inaugural issue of the Korean J Radiol came out in March 2000. Our journal aims to produce and propagate knowledge on radiologic imaging and related sciences. A unique feature of the articles published in the Journal will be their reflection of global trends in radiology combined with an East-Asian perspective. Geographic differences in disease prevalence will be reflected in the contents of papers, and this will serve to enrich our body of knowledge. World's outstanding radiologists from many countries are serving as editorial board of our journal.
The Korean Journal of Rehabilitation Nursing is an official journal of Korean Academic Society of Rehabilitation Nursing and published biannually. This journal is a peer-reviewed research journal devoted to report research that contributes to excellence in practice, education, research, and administration in rehabilitation nursing. Also it contributes to building the knowledge base of the discipline of nursing including theory, practice, and education that provides a better understanding of human responses to illness and the promotion of health; serves an educational function through presenting reports or critiques of conceptual, theoretical, methodological, and ethical issues relevant to population with chronic illness or disability, cancer survivors, caregivers of chronic patients or the disabled, and so on.

The Korean Journal of Thoracic and Cardiovascular Surgery is the official journal of the Korean Society for Thoracic and Cardiovascular Surgery published bimonthly. Its abbreviated title is 'Korean J Thorac Cardiovasc Surg'. It publishes outstanding original articles in general thoracic and cardiovascular surgery and related fields. It is committed to providing a place of active communication for all thoracic surgeons, advancing our knowledge on thoracic and cardiovascular surgery including physiology, diagnosis and treatment, and offering effective treatment and cure to the public ultimately. In addition to members of the Korean Society of Thoracic and Cardiovascular Surgery, any researchers throughout the world can submit a manuscript if the scope of the manuscript is appropriate. It was launched in December 1968. The previous primary title had been 'Taehan Hyungbu Oekwa Hakhoe chi' in Korean till the year 2010 (ISSN 0301-2859). The ISSN has been changed since 2011 due to the change of primary title in English.

The Korean Journal of Urology is the official English-language journal of the Korean Urological Association. It is a peer-reviewed, monthly publication covering clinical and basic science information relevant to physicians and researchers in the field of urology. The incidences, characteristics, and management of diseases vary according to region and race, and the Korean Journal of Urology will provide international readers accesses to Asian data on various urological diseases. Topics include urological oncology, laparoscopy/robotics, lasers in urology, voiding dysfunction, female urology, sexual dysfunction, male infertility, pediatric urology, investigative urology, and innovative treatments, providing readers with an up-to-date guide to international developments in urology. Special features include online video clips and illustrations of newly developed surgical techniques.

Laboratory Animal Research (Lab. Anim. Res.) is published quarterly, on the 30th of March, June, September and December, by Korean Association for Laboratory Animal Science (KALAS). 1. The mission of Laboratory Animal Research (LAR) is to disseminate advanced knowledge about laboratory animal medicine, science and welfare through the publication of peer-reviewed articles about biology, physiology, anatomy, toxicology, and genetics of laboratory animals, animal models, animal behaviour, animal biotechnology and related topics. Articles include original research paper and review about basic and applied laboratory investigations, letters and case reports, as well as informed and thoughtful opinions relevant to the humane care and use of laboratory animals. 2. The corresponding author must confirm that the manuscript was submitted exclusively to Laboratory Animal Research. 3. Manuscripts will be accepted for publication only if the animals in the research discussed were cared for and used humanely. Therefore, authors must state in the manuscript that the animal experiments were conducted according to ethical procedures, and should present the signed page of documents or protocols approved by their Institutional Animal Care and Use Committee (IACUC) or a head of the institutions.

The Korean Society of Osteoporosis Journal is the official journal of the Korean Society of Osteoporosis. It is published three times per year, with articles in Korean with English abstracts or in English. The aims of the Journal are to contribute to the cure of and education about osteoporosis and the advancement of osteoporosis research through the sharing of scientific information on the latest developments in osteoporosis research among members of the Korean Society of Osteoporosis and other international societies. The Journal publishes articles on basic and clinical studies, focusing on areas such as the epidemiology, pathogenesis, complication, and treatment of osteoporosis. The editorial board calls for articles from international research or clinical study groups. Publication is determined by the editors and peer reviewers, who are experts in their specific fields of osteoporosis research. Manuscripts are categorized as original articles, case reports, or reviews. Index words from medical subject headings (MeSH) list of Index Medicus are included in each article to facilitate article searches.

The Journal is also published on the official website of the Korean Society of Osteoporosis (www.koreanosteoporosis.or.kr). It is widely distributed to members of the Korean Society of Osteoporosis, medical school, libraries, and related institutions.

The Korean Academy of University Trained Physical Therapists was founded in June 1994 with the aim of enhancing education quality in physical therapy, boosting relevant practices, and eventually accelerating the expertise of professionals in physical therapy in an international context. This journal is called 'Physical Therapy Korea' in English, with an abbreviation of 'Phys Ther Kor'. Its journal is composed of original articles, review articles, and case reports and it is published four times a year, on Feb 19, May 21, Sep 17, and Nov 19. All manuscripts must be written in either Hangul or English. Submitted manuscripts are reviewed by a board of editors, consisting of three physical therapy specialists in various fields, including the musculoskeletal physical therapy, neurological physical therapy, cardiopulmonary physical therapy, orthopedic physical therapy, sports physical therapy, geriatric physical therapy, pediatric physical therapy and physical therapy assessment. The publication of manuscript depends on the review results. This journal was supported by the Korean Federation of Science and Technology Societies Grant funded by the Korean Government (MEST).

Toxicological Research, the official journal of the Korean Society of Toxicology, is devoted to a rapid publication of research papers, forum articles, review articles and short communications on the toxicology of chemicals and drugs affecting human and animals, which in turn, affect the public health. The goal of the journal is to advance sound scientific understanding of any area of toxicology. Therefore, contributions by toxicologists, molecular biologists, geneticists, biochemists, pharmacologists, clinical researchers and epidemiologists with global view on public well-being through toxicological research are accepted. The toxicological research brings papers from these diverse disciplines together under a single cover, providing a forum for the sharing of information and participation in debate on all aspects of toxicology and public health. Emphasis is given to papers providing an understanding of the toxicological mechanisms affecting animal, human and public health.

Tuberculosis and Respiratory Diseases (Tuberc Respir Dis) is the official journal of the Korean Academy of Tuberculosis and Respiratory Diseases. The Journal publishes high-quality, peer-reviewed clinical or research articles that contribute to the understanding of the pathophysiology, diagnosis, and treatment of tuberculosis and other respiratory diseases. The aims of the Journal are to publish important articles, encourage the exchange of information between members and related healthcare providers, and improve patient and public health. The Journal is distributed to members, related agencies, libraries and the International Union Against Tuberculosis and Lung Disease member countries. Manuscripts that fall outside the scope of the Journal may be submitted for evaluation by the editorial board. Article types published are Original Article, Review, Case Report, Image of the Month, Editorial and Letter to the Editor. The journal is published monthly.
