Algae is published by the Korean Society of Phycology and provides prompt publication of original works on phycology. Algae publishes articles on all aspects of phylogenetics and taxonomy, ecology and population biology, physiology and biochemistry, cell and molecular biology, and biotechnology and applied phycology. Checklists or equivalent manuscripts may be considered for publication only if they contribute original information on taxonomy (e.g., new combinations), ecology or biogeography of more than just local relevance. Contributions may take the form of Original Research Articles, Research Notes, Review Articles and Book Reviews.

Analytical Science and Technology is devoted to publication of original and significant research in the fundamental theory, practice and application of analytical and bioanalytical science. Contributors from broad spectrum of research fields such as chemistry, chemical engineering, material science, pharmaceuticals, agriculture, food and feed and environmental science are welcomed. Types of papers are categorized to original research, review articles, communication, letter, note and comments.

Animal Cells and Systems is the official journal of the Korean Society for Integrative Biology. This international, peer-reviewed journal publishes original papers that cover diverse aspects of biological sciences including Bioinformatics and Systems Biology, Developmental Biology, Evolution and Systematic Biology, Ecology and Population Biology, Molecular and Cellular Biology, Neurobiology and Physiology, and Translational Medicine. Animal Cells and Systems considers all manuscripts on the strict condition that they have been submitted only to Animal Cells and Systems, that they have not been published already, nor are they under consideration for publication or in press elsewhere. Authors who fail to adhere to this condition will be charged with all costs which Animal Cells and Systems incurs and their papers will not be published. Contributions to Animal Cells and Systems must report original research and will be subjected to review by referees at the discretion of the Editorial Office.

The Asia-Pacific Journal of Atmospheric Sciences (APJAS) is co-published by the Korean Meteorological Society (KMS) and Springer in February, May, August and November. The APJAS publishes original scientific research in all the fields of atmospheric science, with emphasis on but not limited to theoretical/observational/numerical studies on meteorological, climatological, and atmospheric environmental issues in the Asia-Pacific region. In addition to original articles, the APJAS publishes comprehensive reviews on topical subjects, and brief research notes and communications of preliminary results. It has started from 2008 by succeeding the KMS' former journal, the Journal of the Korean Meteorological Society (JKMS), which published total of 47 volumes as of 2011, in its time-honored tradition since 1965.

BioChip J publishes original research and reviews in all areas of the biochip technology in the following disciplines, including protein chip, DNA chip, cell chip, lab-on-a-chip, bio-MEMS, biosensor, micro/nano mechanics, microfluidics, high-throughput screening technology, medical science, genomics, proteomics, bioinformatics, medical diagnostics, environmental monitoring and micro/nanotechnology. The Journal is committed to rapid peer review to ensure the publication of highest quality original research and timely news and review articles.
BMB Reports is an international journal devoted to the very rapid dissemination of timely and significant results in diverse fields of biochemistry and molecular biology. Novel findings in the area of genomics, proteomics, metabolomics, bioinformatics, and systems biology are also considered for publication. For speedy publication of novel knowledge, we aim to offer a final decision to the authors in less than 3 weeks from the submission date. BMB Reports is published by Korean Society for Biochemistry and Molecular Biology.

Carbon Letters aims to be a comprehensive journal with complete coverage of carbon materials and carbon-rich molecules. These materials range from, but are not limited to, diamond and graphite through chars, semicoke, mesophase substances, carbon fibers, carbon nanotubes, graphenes, carbon blacks, activated carbons, pyrolytic carbons, glass-like carbons, etc. Papers on the secondary production of new carbon and composite materials from the above mentioned various carbons are within the scope of the journal. Papers on organic substances, including coals, will be considered only if the research has close relation to the resulting carbon materials. Carbon Letters also seeks to keep abreast of new developments in their specialist fields and to unite in finding alternative energy solutions to current issues such as the greenhouse effect and the depletion of the ozone layer. The renewable energy basics, energy storage and conversion, solar energy, wind energy, water energy, nuclear energy, biomass energy, hydrogen production technology, and other clean energy technologies are also within the scope of the journal. Carbon Letters invites original reports of fundamental research in all branches of the theory and practice of carbon science and technology.

Current Applied Physics is an international journal which covers the whole field of applied science investigating the physics of the advanced materials for future applications. Other areas covered: Experimental and theoretical aspects of advanced materials and devices dealing with synthesis or structural chemistry, physical and electronic properties, photonics, engineering applications and uniquely pertinent measurement or analytical techniques. Current Applied Physics covers physics, chemistry and material science, including bio-materials, with their engineering aspects. Current Applied Physics is a truly interdisciplinary journal opening a forum for the scientists of all related fields, a unique point of the journal discriminating if from other worldwide and/or Pacific Rim applied physics journals.

**SCIE, SCOPUS, BIOSIS Previews, Zoological Record, Current Contents, Biological Abstracts**
Experimental and Molecular Medicine, EMM, publishes research papers and a limited number of reviews in the fields of basic and applied molecular biology, and experimental biochemistry in medicine. Research areas include analysis of gene structure, function and regulation; molecular mechanisms of genetic recombination; recombinant nucleic acid technology and gene therapy. EMM is also dedicated to the experimental biochemistry in medicine, including the regulatory mechanisms of body functions; structural biology and interaction between proteins and/or nucleic acids. Although special research areas are emphasized for publication, articles dealing with molecular biology and experimental biochemistry in other areas will also be welcomed.
Genes & Genomics is a bimonthly journal in genetics and genomics, which aims to disseminate the rapidly developing genetic information to the genetic community. The coverage extends from fundamental to molecular aspects of the heredity. Disciplines include Mendelian transmission genetics, cytogenetics, molecular genetics and biology, genomics, population genetics, and quantitative genetics.

This is a broad based journal covering all branches of computational or
applied mathematics with special encouragement to researchers in
theoretical computer science and mathematical computing. Thus, the
major areas, such as Numerical Analysis, Discrete Optimization, Linear
and Nonlinear Programming, Theory of Computation (Computational
Complexity, Automata and Formal Languages), Control Theory, Theory
of Algorithms, Computational Logic, Applied Combinatorics (including
graphs, codes, and designs), Coding Theory, Cryptographics, Fuzzy
Theory with applications, Differential Equations with applications, etc.,
are all included. A large variety of scientific problems also necessarily
involve Algebra, Analysis, Geometry, Probability and Statistics, and so
on. The journal welcomes research papers in all branches of
mathematics which have some bearing on the application to scientific
problems, including papers in the areas of Actuarial Science,
Mathematical Biology, Mathematical Economics and Finance.

The Journal of Ecology and Field Biology, an international quarterly journal, is the official journal of the Ecological Society of Korea, and is endorsed by the East Asian Federation of Ecological Societies (EAFES). The Journal of Ecology and Field Biology publishes peer-reviewed, original research papers, reviews, reports, and comments covering all aspects of ecology and field biology of all kinds of organisms, including modeling and theoretical aspects, and the influence of environmental factors on them. The subjects and contents of any review article should be discussed with the Editor prior to submission. The coverage of the journal ranges from molecular-level mechanistic studies to investigations at the whole ecosystem (global) scale. Also, the journal publishes articles presenting research across disciplinary and environmental boundaries, including studies examining interactions among geological, microbial, biological, chemical, physical, hydrological, and societal processes. The aim of the Journal of Ecology and Field Biology is to provide a forum for the ecologist to address and evaluate ecological issues relating to processes and structures at different integration levels (individuals, populations, communities, ecosystems and the landscape). The journal bridges fundamental ecology and environmental ecology and spans the boundaries of spatial and temporal scale, discipline and perspective. The journal particularly encourages submission of papers relating to ecology in East Asia. Studies that are hypothesis driven and with an experimental approach are especially welcome. Unless potential papers document important and relatively unknown aspects of field studies of a broad interest, we discourage papers that describe only the presence and abundance of biota in local habitats as well as papers that are purely systematic.
Journal of Experimental & Biomedical Sciences
J Exp Biomed Sci

http://www.biomed.or.kr/

Journal of Experimental & Biomedical Sciences is the official publication of Korean Society for Biomedical Laboratory Sciences. The Journal encourages the submission of manuscripts describing primarily original investigations in the broad fields of laboratory and biomedical sciences. Reports of purely laboratory or animal investigations should have a clear bearing on the problems of animal and human disease. The Journal will consider manuscripts that are primarily methodologic if the method is novel, if its development poses or answers important biologic questions, or if its description includes data applying it to a study of potential interest to our readership. Papers describing refinements of routine laboratory tests are not encouraged. The Journal publishes reviews and welcomes submission of review manuscripts. Both state-of-the-art comprehensive reviews, directed at research scientists in specific fields, and more general informative reviews, directed at the broader community of biomedical science investigators, are welcome. Authors of reviews should realize that the Journal is multidisciplinary and that review articles for such a journal require appropriate interpretive material. Clarity of resentation is a major criterion for acceptance. Submission of a manuscript implies that it is not being considered concurrently for publication elsewhere.

Journal of Korean Society for Atmospheric Environment, KOSAE, is a multidisciplinary forum for the publication of original researches relevant to the nature, distribution, control technology, and ecological effects of all types of chemical constituents within atmosphere and between atmosphere and other geosphere. The journal is mainly devoted to the advancement of knowledge in the fields of atmospheric measurements and analysis, current status and management, dispersion and reaction, control technology, global environment, health and ecological effect, indoor air quality and other related fields. Manuscripts in the form of research paper, review articles, technical information, special feature and discussion and reply will be included.

Journal of Life Science, JLS, is a monthly journal published by Korean Society of Life Science and aims to promote speedy publication of research work fulfilling the general criteria of significance and scientific excellence. JLS welcomes manuscripts on all the aspects of life sciences such as bioengineering, biotechnology, biochemistry, biomedical science, food and health, biomaterials, cell biology, life science education, microbiology, toxicology, neurobiology, immunology, developmental biology, neuroscience, molecular biology, genetics, genomics, bioinformatics, proteomics, and other topics. Types of contributions are original research papers, reviews, and notes.

The Journal of Magnetics provides a forum for the discussion of original papers covering the magnetic theory, magnetic materials and their properties, magnetic recording materials and technology, spin electronics, and measurements and applications. The journal covers research papers, reviews letters, and notes.
The Journal of Microbiology (JM) publishes papers that deal with research on microorganisms, including archaea, bacteria, yeasts, fungi, microalgae, protozoa, and simple eukaryotic microorganisms. Topics considered for publication include biochemistry, physiology, molecular biology, genetics, genomics, molecular biotechnology, virology, immunology, microbial patho-genesis, ecology, environmental microbiology, molecular systematics, bioinformatics, chemical or physical characterization of microbial structures or products and basic biological properties of organisms. Manuscripts dealing with simple identification of microorganism(s), cloning of a known gene and its expression in a microbial host, and clinical statistics will not be considered for publication by JM.

The Journal of Microbiology and Biotechnology (JMB) is a monthly international journal devoted to the advancement and dissemination of scientific knowledge concerning microbiology, biotechnology, biomedicine and related academic disciplines. It covers scientific and technological aspects of microbiology, including Microbial Ecology and Diversity; Molecular Biology and Omics; Microbial Cell Biology; Bioactive Compounds and Chemical Biology; Biocatalysis and Fermentation Technology; Food Microbiology and Biotechnology; Bioprocess and Metabolic Engineering; Environmental Microbiology and Engineering; Clinical Microbiology and Biomedical Sciences. Since its launch in March 1991, the JMB is published by the Korean Society for Microbiology and Biotechnology (KMB) and distributed by the KMB worldwide.

Journal of the Environmental Sciences
J Environ Sci

http://www.kenss.or.kr/Journal/

Journal of the Environmental Sciences, JES, is devoted to publish original, peer-reviewed research papers on main aspects of environmental sciences, such as environmental chemistry, environmental biology, ecology, geosciences and environmental physics. Appropriate subjects include basic and applied research on atmospheric, terrestrial and aquatic environments, pollution control and abatement technology, and conservation of natural resources, environmental health and toxicology. The objectives are to report on the latest research achievements and developments; to strengthen academic exchanges; to promote cooperation in science and technology; and to contribute to the progress in environmental sciences.

KAS started as a sole publication of the Korean Astronomical Society (KAS) in 1967. In the first years, the journal was published once a year and papers were written in either English or Korean. Because the KAS itself was very small at that time, the number of papers was very small. As the community grew, the volume steadily increased. In 1986, the JKAS shifted to an English-only publication, as the KAS started a new publication called The publication of the Korean Astronomical Society (PKAS) which published articles written in either English or Korean. The frequency of publication was increased to twice a year in 1989, with the new design of the cover. The paper size of the journal has also changed from B5 to A4. The number of papers in JKAS increased steadily, and reached its local maximum in 1997, thanks to the increasing size of the community as well as improvement of research environment in general. However, after 1997 the number of JKAS papers has decreased, while the number of papers published in internationally recognized journals such as Astrophysical Journal, Astronomical Journal, Monthly Notices of Royal Astronomical Society, and Astronomy & Astrophysics by members of the KAS has been increasing very rapidly. JKAS is trying to raise its reputation again by internationalizing itself and by giving better service to authors.

Journal of the Korean Electrochemical Society
J Korean Electrochem Soc

http://journal.kecs.or.kr

Journal of the Korean Electrochemical Society (JKES) is the official journal of the Korean Electrochemical society (KECS). JKES serves the electrochemistry profession and society by publishing technical papers containing the results of scientific and engineering research. It is distributed four times a year. The first volume was published in December of 1998 and contained 10 full papers. Covering fields of this journal are Physical Electrochemistry, Electroanalytical Chemistry and Sensor Technology, Organic and Biological Electrochemistry, Environmental and Electrochemical Engineering, Corrosion and Surface Treatment, Electronic and Ionic Materials, Batteries Technology, Fuel Cell, Electrochemical Capacitors, Solar Cells.

The Journal of the Korean Physical Society (JKPS) covers all fields of physics spanning from statistical physics and condensed matter physics to particle physics. The manuscript to be published in JKPS is required to hold the originality, significance, and recent completeness. The journal is composed of Full paper, Letters, and Brief sections. In addition, featured articles with outstanding results are selected by the Editorial board and introduced in the online version. For emphasis on aspect of international journal, several world-distinguished researchers join the Editorial board. High quality of papers may be express-published when it is recommended or requested.
Journal of the Korean Society for Clothing Industry
J Korean Soc Cloth Ind

http://www.clothing.or.kr

Journal of the Korean Society for Clothing Industry publishes on the professional researches, research trend, and technology of clothing industry. The journal has high scholastic value, for it promptly delivers the news and approaches the problem from the practical and industrial aspects. The journal seeks for practical research that scope over the industrial application, as well as the research review on the theoretical or aesthetical aspect of clothing studies. The object of the society is to make professional contributions to the progress of scholarly researches and eventually to the development of clothing industries.

The Korean Journal of Applied Statistics provides a forum for communication between both applied statisticians and users of applied statistical techniques across a wide range of disciplines including business, computing, economics, ecology, education, management, medicine, operational research and sociology, but papers from other areas are also considered. All the articles should contain analysis of real data.

Korean Journal of Human Ecology publishes peer-reviewed research and theory on the interaction between humans and the environment. Broad spectrum of research fields for consideration of publication includes: clothing and textiles, food and nutrition, housing, home management, consumers, child & the aged and family relations. Editors especially welcome the subjects on practical application to develop and advance the field of human ecology.

The Korean Journal of Limnology is the official publication of the Korean Society of Limnology. It was launched in 1968, and accepts original research articles, short communications reviews, and other invited papers in the field of limnology. The journal is published quarterly in March, June, September, and December each year. Supplemental issues are published occasionally.
This journal is devoted to the publication of research papers on pure and applied mathematics.

The Korean Journal of Microbiology and Biotechnology (KJMB) is a Free Access journal devoted to the advancement and dissemination of scientific knowledge concerning microbiology, biotechnology, biomedicine and related academic disciplines. It covers scientific and technological aspects of microbiology, including Molecular Biology and Omics; Microbial Cell Biology; Bioactive Compounds and Chemical Biology; Biocatalysis and Fermentation Technology; Food Microbiology and Biotechnology; Bioprocess and Metabolic Engineering; Environmental Microbiology and Engineering. The KJMB is issued four times a year and distributed by the Korean Society for Microbiology and Biotechnology.
The Korean Journal of Mycology, KJM, aims to encourage studies on fundamental and applied investigations on the mycology field and share the research information. KJM publishes research papers on all the aspects fungi and fungus-like organisms, including yeasts, filamentous fungi, lichen fungi, oomycetes, moulds, and mushroom. Topics also include molecular and cellular biology, biochemistry, metabolism, developmental biology, environmental mycology, evolution, ecology, taxonomy and systematics, genetics/genomics, fungal pathogen and disease control, physiology, and industrial biotechnology using fungi. Papers in the following types are published: articles, notes and reviews.

The Korean Journal of Nutrition

The Korean Journal of Nutrition is the official Korean journal of the Korean Nutrition Society, which established in 1967, and was published in 1968 to contribute to the scientific development of nutrition and the health and nutrition of mankind, and is currently published 6 times per year. The journal publishes original research manuscripts, review articles, data, and research notes related to the following research categories. However, review articles are received only if commissioned by the Editorial Committee. a. Nutritional biochemistry (animal experiments, in vitro experiments) b. Human & clinical nutrition (human nutrition related to nutrients metabolism, clinical nutrition related to diseases, nutrition throughout the life cycle) c. Public health nutrition (community nutrition, nutrition education, dietary culture, dietary behavior, nutritional epidemiology) d. Institutional food service (food service and management) e. Others

Korean Journal of Optics and Photonics

Korean Journal of Optics and Photonics, KJOP, aims to contribute to science and technology by promoting fundamental knowledge and leading edge applications related with optics. Literatures submitted to KJOP are classified into four types, research literature, short literature, invited literature and description. Original contribution in whole spectrum of optics such as optical science, optical technology, photonics, quantum electronics, optical information processing, biomedical optics, quantum optics and quantum information are invited.

Molecular & Cellular Toxicology publishes original research and reviews in all areas of the complex interaction between the cell’s genome (the sum of all genes within the chromosome), chemicals in the environment, and disease. Acceptable manuscripts are the ones that deal with some topics of environmental contaminants, including those that lie in the domains of analytical chemistry, biochemistry, pharmacology and toxicology with the aspects of molecular and cellular levels. Emphasis will be placed on toxic effects observed at relevant genomics and proteomics, which have direct impact on drug development, environment health, food safety, preventive medicine, and forensic medicine. The journal is committed to rapid peer review to ensure the publication of highest quality original research and timely news and review articles.

Molecules and Cells (Mol. Cells) is an international journal devoted to the advancement and dissemination of fundamental knowledge concerning the molecular biology of cells. Papers on a broad range of topics of general interest to molecular and cell biologists are published. The journal will not publish paper that simply reports the cloning and sequencing of a gene or the preliminary X-ray crystallography without providing evidence for its biological significance. It is published monthly by the Korean Society for Molecular and Cellular Biology (KSMCB) and distributed by Springer.
Mycobiology is an international journal devoted to the publication of fundamental and applied investigations on all aspects of mycology and their traditional allies. It is published quarterly and is the official publication of the Korean Society of Mycology. Mycobiology publishes reports of basic research on fungi and fungus-like organisms, including yeasts, filamentous fungi, lichen fungi, oomycetes, moulds, and mushroom. Topics also include molecular and cellular biology, biochemistry, metabolism, developmental biology, environmental mycology, evolution, ecology, taxonomy and systematics, genetics/genomics, fungal pathogen and disease control, physiology, and industrial biotechnology using fungi.

The manuscript should contain the original research results of all the fields of Physics in general.
Nutrition Research and Practice (NRP) is the official journal, jointly published by the Korean Nutrition Society and the Korean Society of Community Nutrition in 2007. The Journal was initially published quarterly, and then bimonthly, with six issues a year in 2010. NRP aims to stimulate research and practice across broad areas of human nutrition. The Journal publishes peer-reviewed original manuscripts on nutrition biochemistry and metabolism, community nutrition, nutrition and disease management, nutritional epidemiology, nutrition education, institutional foodservice in the following categories: Original Research and Research Notes, Communications, and Reviews. Reviews will be received by invitation of the editors only. Statements made and opinions expressed in the manuscripts published in this Journal represent the views of authors and do not necessarily reflect the position of the Societies.
Ocean Science Journal is a scientific journal published quarterly (March, June, September, December) by the Korean Society of Oceanography (KSO) and Korea Ocean Research and Development Institute (KORDI). OSJ is international and interdisciplinary. Research articles, reviews and notes dealing with physical oceanography, biological oceanography/marine biology, chemical oceanography/marine chemistry, geological oceanography/marine geology, and marine pollution will be considered. OSJ aims to publish a very high quality scientific journal for researchers and other interested people throughout the world.
The journal PAM is dedicated to significant research of broad interests in pure and applied mathematics.
