KOFST
International Journal
2010
Aims and Scope

This is a directory of science, technology, and medicine (STM) journals supported by the Korean Federation of Science Technology Societies, the Republic of Korea. Editors and publishers will be able to compare the bibliographic of their journals from this directory. Also, it will allow the dissemination of the STM journal information from Korea to the world.

Readers

Editors, manuscript editors, publishers, journal designers, librarians, and anyone with a connection to or interest in journal publication are targeted.

Level of content

Those interested in scholarly journals can understand the content easily regardless of level of education.

Limitation

The information was extracted from the journal masthead and editorial board members of last issue of year of 2010. Therefore, some items may not be the most recent or accurate information at the time of publication, and some information may be undisclosed.

Use

This book can be used freely for research and educational purpose without the publisher’s permission if it is cited properly according to the Creative Commons Attribution Non-Commercial License.

Expected time of comprehension

At least 1 hour, maximum 4 hours
Conflict of Interest and Disclaimer

Conflict of Interest
There is no conflict interest to be declared.

Disclaimer
liability: The publishers and editor do not have legal responsibility for the content of this book and do not guarantee the accuracy, completeness, or usability of the information it contains.

privacy/confidentiality policy: Personal information is protected by the government of the Republic of Korea. No individual or organization is permitted to collect personal information from this book. Commercial or criminal use of personal information is strictly prohibited by the law.

accuracy of information: Information evolves continuously, so the accuracy of information is not guaranteed.

disclaimer: Readers should read this book under the assumption that neither the publishers nor the editors have a legal responsibility for the content.

advertisement: There is no commercial advertisement in this book. Any commercial companies mentioned in this book are included not for advertisement but for disclosure of information.

Introduction

In Korea, two major government-funded organizations named the Korean Federation of Science and Technology Societies (KOFST) and the National Research Federation (NRF) have supported the publication of scholarly journals. Beginning in 2010, the Korean government decided to split the journal support organization into two organizations. The NRF supports the arts, humanities, and social science journals while KOFST supports natural, engineering, medical, agricultural-fisheries, and multi-disciplinary sciences. The aim of the financial support for journal publication is to develop science in Korea because science, technology, and medicine (STM) scholarly journals remain invaluable for the propagation of scientists' research results. In 2011, KOFST and NRF supported 125 international journals from Korea after reviewing the publication status of each journal in 2010. Here, a directory of the 125 journals is presented for its bibliographic information. This text is for the dissemination of the journal catalog and other bibliographic information. Editors and publishers will be able to compare the bibliographic information of their journals from this directory. Also, this guide will provide information on Korean STM journals that can be disseminated internationally. From this simple catalog, some analysis was done to show the status of each journal masthead, and related individuals or academic societies.
Each journal was selected by the KOFST staff after reviewing the status of the journal. The journal should provide full text in English and be indexed in SCIE, SCOPUS, PubMed, or other international databases. Also, at least 40 papers should have been published in 2010. If it was indexed in SCIE, it was selected even if it was published in Korean or published fewer than 40 papers in 2010. There are other journal titles published with English full text not included in this directory because they did not meet some of the other criteria. In the end, 125 journals were selected.

From last issue of each of the 125 journals published in 2010, the following bibliographic information was extracted:

Journal’s official title and abbreviated title
pISSN and eISSN
Digital object identifier (DOI) prefix
URL address of journal homepage
Aims and scope
Cover page picture
SCI category and KOFST category
Launch year
Journal title change history
Frequency
Language
Open Access status
Permanence of paper/acid-free paper
Databases indexed
Editor and his/her affiliation
Manuscript editor and his/her affiliation
Publisher and its address, fax and phone numbers, and email address
Printing company and its address

Out of data in the last issue of each journal in 2010, the abbreviated title was inputted after searching for the ISO journal title abbreviation. Journal’s SCI categories was described as it was classified in Journal Citation Ranking (JCR), made by Thomson Reuters. If journal was not indexed in JCR, its SCI categories were suggested considering the aims and scope. Other items were inputted as was printed in the journal. Meanwhile, out of indexed databases, SCI/SCIE, SCOPUS and PubMed were searched and inputted although it is not described at the masthead. Therefore those three databases information is that of October 2011, not that of 2010. An online journal’s information was copied from its web site.

This extracted information was laid out on each page. The results of the analysis of each item are presented as descriptive statistics.

Every journal is supported by KOFST except four journals that are supported by NRF, specifically, Entomological Research, Journal of Asia-Pacific Entomology, Journal of Ceramic Processing Research, and Yonsei Medical Journal.
The directory of each journal was displayed, each on a separate page. The bibliographic information can be seen at a glance. Each item was analyzed.

Out of 125 journals, 39 are engineering science journals, 12 are on agricultural and fisheries science, 42 on medical health science, and 32 on natural science, according to the KOFST category classification. There were no multi-disciplinary journals. Papers in 8 of the journals allowed articles written in Korean or English rather than English only. Out of them, four journals converted to English-only journals during 2011. On the cover page of 83 journals (66.4%), the printed eISSN could be found.

The DOI could be identified in 98 journals (75.2%). Twenty-three journals’ DOI prefix was that of Springer (10.1007). Four journals’ DOI prefix was that of Elsevier (10.1016). One DOI prefix was that of Oxford University Press (10.1080). One was that of Mary Ann Liebert, Inc. (10.1089), one of John Wiley & Sons, Inc. (10.1111), and one of World Scientific Publishing Co. (10.1142). Thirty-one science journals were on the DOI platform of international commercial publishers. There was no website URL address from three of the journals. However, this does not mean that these journals have no website. It means that there was no mention of the website on the journal masthead. The websites of two of these journals could be traced. For only one journal it was impossible to locate the journal website.

The aims and scope could be found in 120 journals (96.0%). The manuscript editor could be found in 32 journals. The staff of InfoLumi, a professional manuscript editing company, works for 16 of these journals. The launch years of the journals are listed in Figure 1.

Forty-eight journals have an open access policy (38.4%). An acid-free paper statement is included in 8 journals, while 35 journals have a permanence of paper statement. The major printing company were Academya (10 journals), Hanrimwon (22), Medrang (19), and ML Communication (5). Forty listed other printing companies. Twenty-nine journals (23.2%) did not disclose their printing companies. Eighty-Five, 94, and 40 journals were listed as SCI(E), Scopus, and PubMed journals respectively.
Discussion

The above results show bibliographic information of international STM journals from Korea. Nowadays, the aims and scope, DOI, and eISSN are basic bibliographic information. If the DOI prefix is observed, the landing page platform of the journal can be disclosed easily. Thirty journals had been published in print or online form by international commercial publishing companies such as Springer, John Wiley & Sons, Inc, Elsevier, Oxford University Press, Mary Ann Liebert, Inc. or World Scientific Publishing Co. It may be a policy of societies to add their journals to international journal database platform.

A large proportion of the international journals from Korea began to be published after 1990. At that time, the government of the Republic of Korea began to adapt a policy of privileged treatment for international journals such as SCI journals. Thereafter, many societies changed the journal language from Korean to English or began to publish new English-language journals. The statement of paper quality was included in 43 journals. Every commercial paper for journal publication from Korea is acid-free paper although only a few kinds are permanent.

Manuscript editors could be identified in 32 journals. This means that those journals hired manuscript editors or requested manuscript editing from professional companies. Some portion of journals mentioned their printing companies. In Korea, usually STM journals have been published by non-profit academic societies. Therefore, they ask printing companies to edit, print, and bind the journals. The indexed databases are also very important information for authors of research papers.

In Korea, only one directory, entitled KAMJE Journals 2009 was released in 2009 by the Korean Association of Medical Journal Editors (KAMJE) [1]. Of course, when the National Library of the Republic of Korea is searched, it is possible to find periodical information. However, there is no differentiation between journals and magazines. Therefore, in the history of scholarly journal directories, KMAJE Journals 2009 is a historical achievement. It lists 184 journal titles, plus each journal's abbreviated title, web site, editor, subject category, journal history, publisher, pISSN, eISSN, and cover design. It also lists the databases in which each journal is listed. It is very interesting to see the present state of medical journal publication in Korea through KAMJE Journals 2009. Another scholarly journal directory is Ulrich's Web Global Serials Directory [2]. It contains a vast number of periodicals from around the world. It contains 636 scholarly journal titles from every research field in Korea, including those that have ceased publication and incorporated/unresolved ones. Now 566 journals are active. However, it is not a complete list of scholarly journals from Korea.

Why is journal directory necessary? It is for readers and researchers worldwide. When a specific journal article was found for citation, it should be possible to obtain the full text from the journal. Now, although many journals are available through their own web sites, many others still have no web site access. Furthermore, basic bibliographic information provides librarians about whether to subscribe to the journal or not. Lastly, through the bibliographic information of the journal, the quality and format of the journal can be estimated. The precise bibliographic information from complete journal catalog is invaluable in the field of library science and for journal editing. Having a list of journals would make it easier to do fact checking and checking reference lists for articles to be published. To receive the manuscript submissions from throughout the world, the bibliographic information such as masthead info should be maintained with a detailed description.

This reference guide is limited because it is based on the description on the journal masthead, while the real situation of some journals is not exactly the same as what is printed.
References

Cancer Research and Treatment is a peer-reviewed open access publication of the Korean Cancer Association. It is published quarterly, one volume per year. Abbreviated title is Cancer Res Treat. It accepts manuscripts relevant to experimental and clinical cancer research. Subjects include carcinogenesis, tumor biology, molecular oncology, cancer genetics, tumor immunology, epidemiology, predictive markers and cancer prevention, pathology, cancer diagnosis, screening and therapies including chemotherapy, surgery, radiation therapy, immunotherapy, gene therapy, multimodality treatment and palliative care.

Asian-Australasian Journal of Animal Sciences (AJAS) aims to publish original and cutting-edge research results and reviews on animal-related aspects of life sciences. Emphasis will be given to studies involving farm animals such as cattle, buffaloes, sheep, goats, pigs, horses and poultry, but studies with aquatic and laboratory animal species can be considered for publication if the areas are related to fundamental aspects of farm animals. Also studies to improve human health using farm animal models can be publishable. AJAS will encompass all area of animal production and fundamental aspects of animal sciences: breeding and genetics, reproduction and physiology, nutrition, meat and milk science, biotechnology, and animal behavior and welfare.

Fisheries and Aquatic Sciences is an international scientific journal of the Korean Society of Fisheries and Aquatic Science, and it was renamed in 2009 after the Journal of Fisheries Science and Technology to reflect the expanded importance of fisheries and aquatic sciences for the 21st century. The journal publishes papers on applied or scientific research relevant to aquaculture, aquatic life and environments, fisheries and seafood sciences. In addition to publishing papers reporting results of original research, the journal will also include, review articles, technical papers, short communications, research notes and book reviews.
The Food Science and Biotechnology (Food Sci. Biotechnol.; FSB) (ISSN:1226-7708) is devoted to the advancement and dissemination of scientific knowledge concerning food science, biotechnology, and related academic disciplines. It is an international English journal published by the Korean Society of Food Science and Technology (KoSFoST), and covers all the scientific and technological aspects of chemistry, biochemistry, biotechnology, processing, engineering, safety, packaging, microbiology, enzymology, enzyme engineering, fermentation technology, bioprocess engineering, and health aspects of foods.
Horticulture, Environment, and Biotechnology (HEB), the official journal of the Korean Society for Horticultural Science, was launched in 1965 as the “Journal of Korean Society for Horticultural Science”. HEB is an international journal, published in English, bimonthly on the last day of even number months, and indexed in ‘Biosys Preview’, ‘SCIE’, and ‘CABI’. The journal is devoted for the publication of original research papers and review articles related to vegetables, fruits, ornamental and herbal plants, and covers all aspects of physiology, molecular biology, biotechnology, protected cultivation, postharvest technology, and research in plants related to environment.

The journal publishes original research papers, review articles and short communications in the basic and applied area concerning insects, mites or other arthropods and nematodes of economic importance in agriculture, forestry, industry, human and animal health, and natural resource and environment management, and is the official journal of the Korean Society of Applied Entomology, the Taiwan Entomological Society and the Malaysian Plant Protection Society.
The Journal of Crop Science and Biotechnology (JCSB) is a peer-reviewed international journal published four times a year. JCSB publishes novel and advanced original research articles on topics related to the production science of field crops and resource plants, including cropping systems, sustainable agriculture, environmental change, post-harvest management, biodiversity, crop improvement, and recent advances in physiology and molecular biology. Also, the covered are related subjects in a wide range of sciences such as the ecological and physiological aspects of crop production and genetic, breeding, and biotechnological approaches for crop improvement. Articles on soil science, meteorology, biometry, and plant protection will also be considered as long as they are significantly related to crop production.

Plant Biotechnology Reports publishes original, peer-reviewed articles dealing with all aspects of fundamental and applied research in the field of plant biotechnology, which includes molecular biology, genetics, biochemistry, cell and tissue culture, production of secondary metabolites, metabolic engineering, genomics, proteomics, and metabolomics. Plant Biotechnology Reports emphasizes studies on plants indigenous to the Asia-Pacific region and studies related to commercialization of plant biotechnology. Plant Biotechnology Reports does not exclude studies on lower plants including algae and cyanobacteria if studies are carried out within the aspects described above.

Biotechnology and Bioprocess Engineering is an international bimonthly journal published by the Korean Society for Biotechnology and Bioengineering. BBE is devoted to the original and novel findings in the wide area of biotechnology and bioengineering. The editors appreciate contributions relevant to basic and applied research of biotechnology and bioengineering. Contributions are classified as Research Articles and Reviews. Manuscripts should report new and significant findings that advance the understanding of applied biology & biochemistry, molecular biology & biomolecular engineering, biocatalysis & biotransformation, combinatorial chemistry, microbiology & metabolic engineering, pharmaceutics & biomaterials, bioprocess control & system engineering, bioseparation, biosensor & bioelectronics, cell culture engineering, environmental biotechnology, food technology, and nanobiotechnology.

The Environmental Engineering Research (EER), published quarterly by the Korean Society of Environmental Engineers (KSEE). The Environmental Engineering Research publishes refereed, original research papers on all aspects of the science and technology of air, soil, and water quality and its management worldwide. Scopes of Journal include: · Atmospheric Environment & Climate change: (global) climate change, green house gas control, air quality modeling · Renewable Energy & Waste Management: energy recovery from waste, incineration, landfill, green energy · Environmental Biotechnology & Ecology: nano-biosensor, environmental genomics, bioenergy, environmental eco-engineering · Physical & Chemical Technology: membrane technology, advanced oxidation · Environmental System Engineering: sea water desalination, ICA (instrument, control, automation), water reuse · Environmental Health & Toxicology: hazardous material, environmental risk assessment, nanotoxicity, pharmaceuticals.

Fibers and Polymers
Fiber Polym
www.springer.com/journal/12221

Aims: The international journal Fibers and Polymers publishes original research results in the fields of fiber and polymer science & engineering. Founded in the beginning of a new millennium, Fibers and Polymers starts with international readership and authorship, combining into one journal such closely related themes as fiber and polymer technologies. Fibers and Polymers is unique because it covers interdisciplinary areas related to fibers, polymers, textiles, apparels, colorants, fiber composites, and polymer processing.

Industrial Engineering and Management Systems (IEMS) has been launched by the APIEMS (Asian Pacific Industrial Engineering and Management Society) and now it is an official journal of APIEMS and KIIE (Korean Institute of Industrial Engineers). IEMS is intended for reporting original quality works on industrial engineering and management systems. The journal publishes original works that have significant theoretical and academic values, novel industrial applications, and case studies. Every manuscript is strictly reviewed by two or more anonymous referees and final acceptance decision is made based on the review reports. The journal aims at speedy review and processing and it will publish four issues per year. IEMS covers all areas of industrial engineering and management sciences including, but not limited to, applied statistics & data mining, business & information systems, computational intelligence & optimization, emerging technologies, ergonomics & human factors, logistics, manufacturing systems, planning & scheduling, quality & reliability, stochastics & simulation, supply chain management.

This journal is an international journal of the Korean Society for Aeronautical & Space Sciences (KSAS). The journal aims to enhance and foster the aeronautical and space sciences and technologies through the publication of original research papers, review articles, and short communications disclosing new advancements in theoretical, computational and/or experimental research. Topics of interest include all aspects of aerospace science and technology, which include acoustics, aerodynamics and fluid mechanics, aerospace telecommunications, airworthiness and maintenance, avionics, combustion and propulsion, flight dynamics, guidance and control, flight simulation and operations, low carbon manufacturing, nano application, plasmas and lasers, research instrumentation and facilities, space exploration, structural dynamics and aeroelasticity, structures and materials, and thermomechanics and reacting flows. The journal also addresses the ground and flight tests of aerospace systems including aircraft, air ship, helicopter, MEMS, missile, satellite, rocket, and UAV. The journal solicits papers from a wide range of countries. Acceptance of a submitted paper will depend on a rigorous technical review and on the judgment of the editors. Papers must be written in a format appropriate for archive publication.

As the only international journal in the field of air-conditioning and refrigeration in Asia, IJACR reports researches in the equipment for controlling indoor environment and cooling/refrigeration. It includes broad range of applications and underlying theories includes fluid dynamics, thermodynamics, heat transfer, and nano/bio-related technologies. In addition, it covers future energy technologies, such as fuel cell, wind turbine, solar cell/heat, geothermal energy and etc.
THE INTERNATIONAL JOURNAL OF AUTOMOTIVE TECHNOLOGY has as its objective the publication and dissemination of original research in all fields of AUTOMOTIVE TECHNOLOGY, SCIENCE and ENGINEERING. It fosters thus the exchange of ideas among researchers in different parts of the world and also among researchers who emphasize different aspects of the foundations and applications of the field. Standing as it does at the cross-roads of Physics, Chemistry, Mechanics, Engineering Design and Materials Sciences, AUTOMOTIVE TECHNOLOGY is experiencing considerable growth as a result of recent technological advances. The Journal, by providing an international medium of communication, is encouraging this growth and is encompassing all aspects of the field from thermal engineering, flow analysis, structural analysis, modal analysis, control, vehicular electronics, mechatronics, electromechanical engineering, optimum design methods, ITS, and recycling. Interest extends from the basic science to technology applications with analytical, experimental and numerical studies. The emphasis is placed on contributions that appear to be of permanent interest to research workers and engineers in the field. If furthering knowledge in the area of principal concern of the Journal, papers of primary interest to the innovative disciplines of AUTOMOTIVE TECHNOLOGY, SCIENCE and ENGINEERING may be published. Papers that are merely illustrations of established principles and procedures, even though possibly containing new numerical or experimental data, will generally not be published. When outstanding advances are made in existing areas or when new areas have been developed to a definitive stage, special review articles will be considered by the editors.

The International Journal of Control, Automation, and Systems (IJCAS) is a bimonthly published periodical. As of 2003, it is a joint publication of Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the four technical areas included are: Control Theory, Control Applications, Robotics and Automation, Intelligent and Information Systems.
International Journal of Fuzzy Logic and Intelligent Systems (IJFIS) is published semiannually. IJFIS will consider papers that deal with the theory, design or an application of fuzzy logic and intelligent systems ranging from hardware to software. IJFIS publishes two types of articles: full papers and correspondence.

International Journal of Naval Architecture and Ocean Engineering

Int J Naval Archit Ocean Eng

http://jnaoe.org

International Journal of Naval Architecture and Ocean Engineering provides a forum for engineers and scientists from a wide range of disciplines to present and discuss various phenomena in the utilization and preservation of ocean environment. Without being limited by the traditional categorization, it is encouraged to present advanced technology development and scientific research, as long as they are aimed for more and better human engagement with ocean environment. Topics include, but not limited to: marine hydrodynamics; structural mechanics; marine propulsion system; design methodology & practice; production technology; system dynamics & control; marine equipment technology; materials science; under-water acoustics; satellite observations; and information technology related to ship and marine systems; ocean energy systems; marine environmental engineering; maritime safety engineering; polar & arctic engineering; coastal & port engineering; aquacultural engineering; sub-sea engineering; and specialized water-craft engineering. International Journal of Naval Architecture and Ocean Engineering is published quarterly in association with the Society of Naval Architects of Korea. In addition to original, full-length, refereed papers, review articles by leading authorities and articulated technical discussions of highly technical interest are also published.

The International Journal of Precision Engineering and Manufacturing accepts original contributions on all aspects of precision engineering and manufacturing. The journal's specific focus areas include, but are not limited to: Precision Manufacturing Processes, Measurements and Control, Robotics and Automation, Manufacturing Systems, Design and Materials, Machine Tools, Nano/Micro Technology, Biomechanical Engineering, Rapid Prototyping and Manufacturing, Green Manufacturing Technology. Surveys and reviews will also be planned in consultation with the Editorial Board.
The International Journal of Steel Structures aims to provide an international forum for a broad classification of technical papers in steel structural research and its applications. The journal aims to reach not only researchers, but also practicing engineers who will most likely benefit from the published research results. Contributions on research findings that are suitable for practical applications are especially welcome. The scope of the International Journal of Steel Structures encompasses, but is not limited to, the following areas: stability, fatigue, non-linear behavior, dynamics, reliability, design codes, computer-aided analysis and design, optimization, expert systems, connections, fabrications, maintenance, bridges, off-shore structures, jetties, stadiums, transmission towers, marine vessels, storage tanks, pressure vessels, aerospace, and pipelines.

The JOURNAL OF COMMUNICATIONS AND NETWORKS is published six times per year, and is committed to publishing high-quality papers that advance the state-of-the-art and practical applications of communications and information networks. Theoretical research contributions presenting new techniques, concepts, or analyses, applied contributions reporting on experiences and experiments, and tutorial expositions of permanent reference value are welcome. The subjects covered by this journal include all topics in communication theory and techniques, communication systems, and information networks. COMMUNICATION THEORY AND SYSTEMS includes information theory, modulation/signal design, detection/estimation, fading/equalization, optical communications, transmission systems, access systems, synchronization, error control coding, source coding/data compression, security/cryptography, cognitive radio, compressed sensing, and network coding. WIRELESS COMMUNICATIONS includes mobile and portable communications systems, transmission modulation and coding for mobile terrestrial and satellite systems, multi-carrier systems, cooperative communications, multi antenna/user systems, ultra-wideband communications, wireless network design and performance evaluation including traffic analysis, ad hoc and sensor networks, MAC protocols, and generally simulation or analytical evaluation of any wireless systems. NETWORKS AND SERVICES includes network physical and software architecture, communication protocols, network hardware and software technologies, switching and routing, multimedia techniques, Internet/Intranet protocols and services, mobility networks and protocols, operations and management, signaling and control, active networks, services and applications.

The Journal of Information Processing Systems is committed to publishing high-quality papers on the state-of-the-art of information processing systems. Theoretical research contributions presenting new techniques, concepts, or analyses, reports on experiences and experiments of implementation and application of theories, and tutorials on new technologies and trends are all welcome. The subjects covered by the journal include all topics related to computer system and theory, information system and multimedia, communication system and security, and software system and application.
The Journal of Mechanical Science and Technology is a monthly periodical published on the first day of each month. The aims of the journal is to provide an international forum for the publication and dissemination of original works that contribute to the understanding of the main and related disciplines of mechanical engineering, either empirical or theoretical. The journal covers the whole spectrum of mechanical engineering, which includes, but is not limited to, fluids engineering, materials and design engineering, thermal and power engineering, production engineering and fusion technology, dynamics, vibration, and control. Manuscripts may fall into several categories including regular contributed paper, brief papers, solicited/unsolicited reviews or commentaries related to the core of mechanical engineering. It is also proposed to maintain an international diary of forthcoming events, Prospective guest editors for publishing a special issue should contact the Editor-in-Chief of the Journal.
Journal of Power Electronics is the official publication of the Korean Institute of Power Electronics (KIPE). The journal is open to submission from scholars and experts in the wide areas of power electronics and electrical drives from the global world. The scope of the journal includes all issues in the field of Power Electronics. Included are techniques for power converters, adjustable speed drives, renewable energy, power quality and utility applications, analysis, modeling and control, power devices and components, power electronics education, and other applications.

The Korea-Australia Rheology Journal is the official transactions co-published quarterly by the Korean Society of Rheology and the Australian Society of Rheology. The Korea-Australia Rheology Journal is devoted to fundamental and applied research with immediate or potential value in rheology.
The Korean J. Chem. Eng. is a general journal for the publication of significant research results in all areas of chemical engineering. Papers will be published only if they are considered by the Editors to be of potential industrial significance and specifically concerned with chemical engineering. The editors will give preference to papers having a clearly stated practical scope and applicability in the areas of chemical engineering, and to those where new theoretical concepts are supported by new experimental details. Four types of manuscripts are published in the journal: Journal Reviews, Research Papers, Rapid Communications, Letters to the Editor.

The KSII Transactions on Internet and Information Systems (TIIS) is an online scholarly journal indexed in SCIE (Thomson Reuters) and SCOPUS (Elsevier) and published by KSII and supported by KETI. The Transactions is published every month. The Transactions is designed to allow readers to obtain the most state of the art in a number of focusing areas related to wired & wireless internet and information systems. The technologies and applications of IT are very rapidly changing and updating. Thus quick publication and distribution to researchers, developers, deployment engineers, technical managers, and educators are crucial. Our most important aim is to publish the accepted papers quickly after receiving the manuscript. The Transactions consists of regular and special issue papers. The papers are strictly peer-reviewed. Both theoretical and practical contributions are encouraged.

The scope of interests of the Transactions includes, but is not limited to, the following:

1) Internet & Communications comprising Wireless sensor networks/wireless mesh networks, Smartphone applications and services, Social networks, Ubiquitous/pervasive computing/WBAN (wireless body area networks), Internet contents, Mobile/vehicular ad-hoc network communications, LTE/WiMax and MIMO/OFDM, Cognitive radio and cooperative communications, and Energy-efficient communications and green computing.

2) Multimedia comprising Multimedia signal processing/graphics/vision systems and Multimedia communications.

3) Internet Security comprising Internet security and Network security.

Macromolecular Research publishes original researches on all aspects of polymer science, engineering, and technology, which have not been or are not to be published elsewhere. Papers include Articles, Communications, Notes, Reviews, and Feature articles on the same basis. Articles are comprehensive reports of significant results and should have high scientific quality and originality. Communications should be preliminary reports of unusual urgency and significance. A more complete paper may be published at a later date. A Note deals with a limited subject which requires no further elaboration in the future. The length of both Communications and Notes should be less than 2000 words. Reviews should be short, critical surveys of progress in limited fields of macromolecular research made in recent years. Feature articles are invited reviews self-centered on the author’s own research and may contain original results.

http://nuclear.or.kr

Nuclear Engineering and Technology (NET), an international journal of the Korean Nuclear Society (KNS), bimonthly publishes articles related to the theory and application of nuclear science and technology. NET publishes research papers and technical notes. All papers and technical notes will be reviewed for technical content. It is understood that the paper has been neither published nor currently submitted for publication elsewhere. The copyright of all published papers and notes will be vested in KNS. No article can be published unless accompanied by a signed publication agreement which specifies a transfer of copyright from authors to KNS and author responsibility for protecting proprietary and third-party rights.

Polymer (Korea) is an official journal published bimonthly by the Polymer Society of Korea. The journal covers a wide range of the highly multidisciplinary fields of polymer science, engineering, and technology. The manuscript can be written in both Korean and English. The journal publishes original research papers including articles, communications, and notes. Also reviews and feature articles can be considered for publication by invitation base.

The STRUCTURAL ENGINEERING AND MECHANICS, An International Journal, aims at: providing a major publication channel for structural engineering; wider distribution at more affordable subscription rates; faster reviewing and publication for manuscripts submitted; and a broad scope for wider participation. The main subject of the Journal is structural engineering concerned with aspects of mechanics. Areas covered by the Journal include: Structural Mechanics; Design of Civil, Building and Mechanical Structures; Structural Optimization and Controls; Structural Safety and Reliability; New Structural Materials and Applications; Effects of Wind, Earthquake and Wave Loadings on Structures; Fluid-Structure and Soil-Structure Interactions; AI Application and Expert Systems in Structural Engineering. Submission of papers from practising engineers is particularly encouraged.

The main purpose of Transactions on Electrical and Electronic Materials (Trans. Electr. Electron. Mater.: TEEM) is to provide an open forum to report and share significant new findings on electrical and electronic materials for the materials research communities. The topics covered by the journal include but not limited to new semiconductor materials and devices, electronic ceramics, electrical insulation materials, thin film devices/sensors, display/optical devices, superconducting magnetic materials and devices, nanomaterials and nanodevices, and photovoltaic materials and devices. Transactions on Electrical and Electronic Materials enables professionals in research and industry to keep track of up-to-date developments in the above-mentioned fields and their importance for future developments and success.

Anatomy & Cell Biology (ACB) is an international forum for multi-perspective network of all fields of anatomy, particularly the field of Cell Biology based on Anatomy. The journal publishes papers ranging from the basic to the applied fields, and covers all levels of biological organizations in human bodies as well as in experimental model systems. The journal encourages submissions of microscopic studies with genetic, molecular and biochemical approaches. Anatomy and Cell Biology is of interest to anatomist, cell biologist, clinicians, and researchers working in biotechnology, as well. Manuscript submissions receive prompt attention from the Editor-in-Chief and undergo peer review with the supervision of the Journal’s Editorial Board. Anatomy and Cell Biology features 1) Original research articles, 2) Case reports and Technical reports, 3) short communications and 4) review articles.
Annals of Dermatology is primarily intended for publication of contributors who are interested in dermatology and researches on the biology and pathology of the skin all over the world and is expected to promote sincere communication among the physicians working in this field.

Archives of Pharmacal Research is an interdisciplinary journal devoted to the publication of original scientific research papers that aim to develop new drugs in the fields of medicinal chemistry, natural products, pharmacology, toxicology, pharmaceutics, microbiology, and basic biomedical sciences. The journal specifically aims to enhance scientific understanding in the fields. Thus, technical reports that document pharmacological and toxicological observations will not be generally accepted in the journal. Manuscripts will be considered for publication on the condition that the results reported are based on original research that has not been published elsewhere in any journal. Upon acceptance for publication of an article in Archives of Pharmacal Research, the author tacitly agrees to make available any materials used in the published experiments, or novel or natural products disclosed in the article that are not commercially available, so that other researchers may confirm the observations. In addition, natural product contribution must meet the following specific criteria: a) any natural extract must be defined, and appropriate information provided regarding the origin; and b) the author must be able to state that the material under study is endotoxin free. Please note that studies with crude extract and on chemical structures will not be accepted.

As the official journal owned and published by the Korean Association of Immunologists (KIA), Immune Network publishes novel peer-reviewed original findings and review articles in all areas of basic and clinical immunology. Areas covered include, but are not limited to, cellular immunology and immune regulation, molecular and structural immunology, innate immunity and inflammation, autoimmunity, transplantation and tumor immunology, and immunotherapy. Priority is given to studies that provide fundamental insight into the network of host immune responses. Major criteria for acceptance are quality, originality, clarity, and conciseness.
The Journal of Acupuncture and Meridian Studies is a quarterly, peer-reviewed journal featuring high-quality studies related to basic and clinical acupuncture and meridian research. It also includes new paradigm of integrative research, covering East-West and traditional-modern medicine. Manuscripts should fall into one of the categories: topical review, original research paper, brief report and case report. The areas covered by the journal include: basic and clinical research on acupuncture and meridian studies; integrative biomedical research; and health science in general and other modalities. The subjects covered by the journal include acupressure, electroacupuncture, laser therapy, pharmacopuncture (herbal acupuncture, acupoint injection), herbology (herbal medicine), veterinary acupuncture, and related animal studies. Articles on general health science and other modalities, such as anthroposophy, homeopathy, ayurveda, bioelectromagnetic therapy, chiropractic, neural therapy and meditation, may also be eligible for consideration if the articles are related to acupuncture and meridian studies.

The Journal of Breast Cancer is the official journal of the Korean Breast Cancer Society, which is issued quarterly with open access. The journal aims to provide a forum for the academic communication between medical doctors, basic science researchers, and health care professionals to be interested in breast cancer. To get this aim, we publish original investigations, review articles, brief communications including case reports, editorial opinions on the topics of importance to breast cancer, and welcome new research findings and epidemiological studies, especially when they contain a regional data to grab the international reader's interest. Although the journal is mainly dealing with the issues of breast cancer, rare cases among benign breast diseases or evidence-based scientifically written articles providing useful information for clinical practice can be published as well.

The Journal of Clinical Neurology (JCN) is an official journal of the Korean Neurological Association and is published quarterly (in March, June, September, and December). The JCN publishes research articles in neurology, neuroscience, and related fields. Although we are primarily interested in clinical work, experimental or translational research works are also considered if they are related to clinical practice.
The Journal of Ginseng Research is a quarterly, peer-reviewed publication featuring high-quality studies related to basic and clinical aspects of ginseng to reflect recent progresses in ginseng research. Manuscripts are classified mainly into review articles, original research articles, and brief reports. The Journal of Ginseng Research has published original works, either experimental or theoretical, that advance our understanding of ginseng science, including cultivation, biology, chemistry, pharmacology, biochemistry, manufacture, and clinical study of ginseng since 1976. It also includes new paradigm of integrative research, covering alternative medicinal approaches.
The Journal of Gynecologic Oncology (JGO) is an international periodical journal on recent developments in the management of female reproductive tract cancers. The JGO’s goal is to publish the highest quality manuscripts dedicated to the advancement of the care of patients with gynecologic cancer. The journal publishes editorials, original articles, reviews, correspondences and case reports. Research areas covered by this journal include: epidemiology, treatment strategies such as surgery, chemotherapy, radiotherapy, or combination therapy, quality of life issues, and basic research comprising genetics, immunology, and translational research.

The Journal aims at publishing evidence-based, scientifically written articles from all disciplines of medical sciences. The Journal welcomes articles of general interest to audience of medical researchers especially when they contain new information. Articles of clinical evaluation of drugs and other therapies, epidemiologic studies in general population, studies on pathogenic organisms and toxic materials, toxicities and adverse effects of therapeutics are welcome. Studies based on national data, multidisciplines, multicenter collaboration, and basic mechanisms are encouraged.
Journal of Korean Neurosurgical Society is the official journal of the Korean Neurosurgical Society, and published monthly. This Journal publishes important papers covering the whole field of neurosurgery, including studies in neuroscience, neurology, and molecular biology. Studies on rare cases and technical notes of special instruments or equipment that might be useful to the field of neurosurgical science are also acceptable. Papers, to be accepted, will include original work (clinical and laboratory research), case reports, surgical notes, review articles, letters to the editor, etc. Review articles can be published upon specific request by the journal. Authors can publish special drafts with the approval from the editorial board. Case reports should be brief, and avoid an extensive review of the literature. It should be assured that authors must not simultaneously submit an identical or similar paper for publication elsewhere. Multiple publication is acceptable only in the case of meeting the criteria of Uniform Requirements for Manuscripts Submitted to Biomedical Journals (Ann Intern Med 108 : 258-265, 1988). Manuscripts must be prepared in accordance with Uniform requirements for Manuscripts submitted to Biomedical Journal developed by International Committee of Medical Journal Editors (February 2006).

The Journal of Veterinary Science (J Vet Sci) is an international peer-reviewed journal dedicated to providing to the advancement and dissemination of scientific knowledge concerning veterinary sciences and related academic disciplines. This Journal is published four times per year (March 31, June 30, September 30 and December 31) in English by the Korean Society of Veterinary Science (KSVS) being distributed worldwide. It covers all the scientific and technological aspects of veterinary sciences in general, anatomy, physiology, biochemistry, pharmacology, microbiology, pathology, public health, parasitology, infectious diseases, clinical sciences, alternative veterinary medicine and other biomedical fields. Any author(s) affiliated with a biomedical institution may submit manuscripts. Full text PDF files are available on the web at http://www.vetsci.org.
Korean Circulation Journal is a professional, peer-reviewed journal covering the broad fields of cardiovascular diseases. It is the official journal of The Korean Society of Cardiology, The Korean Pediatric Heart Society, and The Korean Society of Lipidology and Atherosclerosis which is published monthly in English. Korean Circulation Journal publishes scientific and state-of-the-art clinical articles aimed at improving human health in general and contributing to the treatment and prevention of cardiovascular diseases in particular. The journal covers original articles of basic research and clinical findings, reviews, editorials, case reports, and images in cardiovascular medicine from members of The Korean Society of Cardiology, The Korean Pediatric Heart Society, The Korean Society of Lipidology and Atherosclerosis, and other international societies providing a forum for sharing information, views, experiences, and educational materials in all cardiovascular-related areas.

The Korean Diabetes Journal as the official journal of the Korean Diabetes Association. It is published bimonthly, with articles in English accepted through the process of peer review. The aims of the Journal are to contribute to the cure of and education about diabetes mellitus and the advancement of diabetology through the sharing of scientific information on the latest developments in diabetology among members of the Korean Diabetes Association and other international societies. The Journal publishes articles on basic and clinical studies, focusing on areas such as metabolism, epidemiology, pathogenesis, commentaries, and treatments relevant to diabetes mellitus. Articles on translational research and timely issues including ubiquitous care or new technology in the management of diabetes and metabolic disorders are welcome. Priority is given to studies conducted with Asian diabetic subjects. The editorial board invites articles from international research or clinical study groups. Publication is determined by the editors and peer reviewers, who are experts in their specific fields of diabetology. Manuscripts are categorized as original articles, reviews, commentaries, or letters to the editor. Index words from medical subject headings (MeSH) list of Index Medicus are included in each article to facilitate article searches. The Journal is also published on the official website of the Diabetes & Metabolism Journal (http://e-dmj.org) and is widely distributed to members of the Korean Diabetes Association, medical schools, libraries, and international institutions.

Korean Journal of Anesthesiology (Korean J Anesthesiol) is the official journal of the Korean Society of Anesthesiologists founded in 1956. It has been published since 1968. It publishes peer-reviewed research articles monthly. It aims to promote the fundamental understanding of anesthesiology including practice of perioperative management, critical care, and pain medicine. Also it is committed to disseminate high-quality articles to assist anesthesiologists’ daily clinical practices.
The Korean Journal of Internal Medicine is an international medical journal published in English by the Korean Association of Internal Medicine. The Journal publishes peer-reviewed original articles, reviews, and editorials on all aspects of medicine, including clinical investigations and basic research. Both human and experimental animal studies are welcome, as are new findings on the epidemiology, pathogenesis, diagnosis, and treatment of diseases. Case reports will be published only in exceptional circumstances, when they illustrate a rare occurrence of clinical importance. Letters to the editor are encouraged for specific comments on published articles and general viewpoints.
The journal publishes Original Articles, Case Reports, Brief Communications, Letters to the Editor, and Review Articles requested by the editorial board about new and important subjects in laboratory medicine that are related to the etiology, diagnosis, and treatment of diseases and are scientific, original, ethical, and academically significant.

The Korean Journal of Ophthalmology is a bimonthly, peer-reviewed journal, which publishes original reports of basic and clinical research in all fields of ophthalmology and visual science. The ultimate goal of the Korean Journal of Ophthalmology is to contribute to global health and well-being by improving the science and technology of ophthalmology and clarifying the distinctions between different regions of the world. Main features include clinical observations, new diagnostic methods, surgical techniques, treatment methods and results of clinical trials. Anyone who agrees with our aims and scope is eligible to submit a manuscript. The journal is distributed to the members of the Korean Ophthalmological Society, medical libraries, and many other institutions worldwide to promote the development of ophthalmology and academic exchanges among the Korean Ophthalmological Society members as well as international colleagues.
KJO has goal to inform its readers of significant development and contemporary trends in all areas related to orthodontics and dentofacial orthopedics, including diagnosis and treatment planning, technique and appliance design, biomechanics, growth and development, temporomandibular disorders, orthognathic surgery, physiology, biochemistry, and epidemiology. The Journal publishes new and interesting information with specific regard to cutting-edge treatment trends of Korea and East-Asian countries as well as the global milieu of orthodontics. 3-dimensional imaging, mini-implants, biomaterials, treatment of surgical cases are the latest vital issues of the Journal.
The Korean Journal of Pain, the official journal of the Korean Pain Society founded in 1986, publishes original articles related to all aspects of pain, including clinical and basic research, patient care, education, and health policy. It is published quarterly in English. The mission of the Journal is to improve the care of patients in pain by providing a forum for clinical researchers, basic scientists, clinicians, and other health professionals.

The Korean Journal of Pathology provides a forum for the understanding of the pathologic processes and evaluation of new and existing diagnostic applications of scientific advances and clinical pathologic correlations; fostering the acquisition and maintenance of up-to-date information to ensure high standards of practice; and, encouraging the publication of new information.

Scope

The Korean Journal of Pathology provides important and up-to-date information on the pathology and cytopathology. The coverage has a wide scope, encompassing histologic and cytologic diagnostic processes, clinicopathologic correlations, illustrative cases, molecular biology, and experimental pathology. The categories of manuscript include original articles, review articles, case reports, short case reports, and letters to the editor. All of the submitted papers are thoroughly reviewed by two or more reviewers. The journal observes the Good Publication Practice Guidelines for Medical Journals by Korean Association of Medical Journal Editors.

Our journal aims to produce and propagate knowledge on radiologic imaging and related sciences. A unique feature of the articles published in the Journal will be their reflection of global trends in radiology combined with an East-Asian perspective. Geographic differences in disease prevalence will be reflected in the contents of papers, and this will serve to enrich our body of knowledge. World’s outstanding radiologists from many countries are serving as editorial board of our journal.
The Korean Journal of Urology is the official English-language journal of the Korean Urological Association. It is a peer-reviewed, monthly publication covering clinical and basic science information relevant to physicians and researchers in the field of urology. The incidences, characteristics, and management of diseases vary according to region and race, and the Korean Journal of Urology will provide international readers accesses to Asian data on various urological diseases. Topics include urological oncology, laparoscopy/robotics, lasers in urology, voiding dysfunction, female urology, sexual dysfunction, male infertility, pediatric urology, investigative urology, and innovative treatments, providing readers with an up-to-date guide to international developments in urology. Special features include online video clips and illustrations of newly developed surgical techniques.
Aims & scope not available from masthead.

This journal endeavors to publish significant research of broad interests in pure and applied mathematics. To be published in the Bulletin, a paper must be correct, new, nontrivial, and significant.
Carbon Letters publishes original research on all aspects of carbon science, engineering and technology, which have not been or are not to be published elsewhere.
Current Applied Physics is an international journal, which covers all the fields of applied science investigating the physics of the advanced materials for future applications. Other areas covered: Experimental and theoretical aspects of advanced materials and devices dealing with synthesis or structural chemistry, physical and electronic properties, photonics, engineering applications and uniquely pertinent measurement or analytical techniques. Current Applied Physics covers physics, chemistry and material science, including bio-materials, with their engineering aspects, i.e. spintronics and superconductivity, photonics, optoelectronics, and spectroscopy, semiconductor device physics, nanoscale materials, syntheses of advanced materials and its characterization, plasma physics and technology, dielectrics, ferroelectrics and multiferroics, organic electronics and photonics, energy-related materials and devices, biophysics and bioengineering. The journal is a truly interdisciplinary journal opening a forum for the scientists of all related fields.

Entomological Research, the successor of the Korean Journal of Entomology, published by the Entomological Society of Korea (ESK) since 1970, is the official English language journal of ESK, and publishes original research articles dealing with any aspect of entomology. Papers in any of the following fields will be considered, systematics, ecology, physiology, biochemistry, pest control, embryology, genetics, cell and molecular biology, medical entomology, apiculture and sericulture. The Journal publishes research papers, short communications and technical notes, as well as invited reviews.

EXPERIMENTAL and MOLECULAR MEDICINE, EMM, publishes research papers and a limited number of reviews in the fields of basic and applied molecular biology, and experimental biochemistry in medicine. Research areas include analysis of gene structure, function and regulation; molecular mechanisms of genetic recombination; recombinant nucleic acid technology and gene therapy. EMM is also dedicated to the experimental biochemistry in medicine, including the regulatory mechanisms of body functions; structural biology and interaction between proteins and/or nucleic acids. Although special research areas are emphasized for publication, articles dealing with molecular biology and experimental biochemistry in other areas will also be welcomed.
Genes & Genomics is a bimonthly journal in genetics and genomics. It aims to disseminate the rapidly developing genetic information to the genetic community. The coverage extends from fundamental to molecular aspects of the heredity. The disciplines are Mendelian transmission genetics, cytogenetics, molecular genetics and biology, genomics, population genetics, and quantitative genetics.
“Genomics & Informatics” publishes high-quality research papers presenting novel data on the topics of gene discovery, comparative genome analyses, molecular and human evolution, informatics, genome structure and function, technological innovations and applications, statistical and mathematical methods, cutting-edge genetic and physical mapping and DNA sequencing, and other reports that present data where sequence information is used to address biological concerns. The Journal publishes papers based on original research that are judged after editorial review to make a substantial contribution to the understanding of any area of genomics or informatics.

Journal of Astronomy and Space Sciences
J Astron Space Sci

http://janss.kr

Journal of Astronomy and Space Science is an international journal devoted to the publication of fundamental and applied investigations on all aspects of astronomy, space science and space technology. It is published quarterly and is the official publication of the Korean Space Science Society. This Journal is open access journal, consequently, articles are free for all users to read and use. Topics also include astrophysics, observational astronomy, archaeoastronomy, astrodynamics, geodesy, planetary science, solar physics, spacecraft guidance and navigation, satellite dynamics and control, and all applications of space technology. Manuscripts must be prepared according to the instructions that follow; those that do not conform or are incomplete may be returned for correction prior to review. Each article published is assigned a unique DOI that serves to identify the article in a digital environment.

Subject Categories (SCI)  Astronomy & Astrophysics
                         Geosciences, Multidisciplinary

The Journal of Ecology and Field Biology, an international quarterly journal, is the official journal of the Ecological Society of Korea, and is endorsed by the East Asian Federation of Ecological Societies (EAFES). The Journal of Ecology and Field Biology publishes peer-reviewed, original research papers, reviews, reports, and comments covering all aspects of ecology and field biology of all kinds of organisms, including modeling and theoretical aspects, and the influence of environmental factors on them. The subjects and contents of any review article should be discussed with the Editor prior to submission. The coverage of the journal ranges from molecular-level mechanistic studies to investigations at the whole ecosystem (global) scale. Also, the journal publishes articles presenting research across disciplinary and environmental boundaries, including studies examining interactions among geological, microbial, biological, chemical, physical, hydrological, and societal processes. The aim of the Journal of Ecology and Field Biology is to provide a forum for the ecologist to address and evaluate ecological issues relating to processes and structures at different integration levels (individuals, populations, communities, ecosystems and the landscape). The journal bridges fundamental ecology and environmental ecology and spans the boundaries of spatial and temporal scale, discipline and perspective. The journal particularly encourages submission of papers relating to ecology in East Asia. Studies that are hypothesis driven and with an experimental approach are especially welcome. Unless potential papers document important and relatively unknown aspects of field studies of a broad interest, we discourage papers that describe only the presence and abundance of biota in local habitats as well as papers that are purely systematic.

The Journal of Microbiology and Biotechnology (JMB) is a monthly international journal devoted to the advancement and dissemination of scientific knowledge concerning microbiology, biotechnology, biomedicine and related academic disciplines. It covers scientific and technological aspects of microbiology, including physiology and metabolism; environmental, food, and medical microbiology; molecular microbiology; enzymology and enzyme engineering; fermentation technology; plant and animal cell cultures; bioprocess engineering; and biomedical sciences. The JMB is published and distributed, on the 28th of every month, by the Korean Society for Microbiology and Biotechnology (KMB).
The Journal of Microbiology publishes descriptions of basic research on microorganisms, including fungi and other unicellular eukaryotic organisms.

KAS started as a sole publication of the Korean Astronomical Society (KAS) in 1967. In the first years, the Journal was published once a year and papers were written in either English or Korean. Because the KAS itself was very small at that time, the number of papers was very small. As the community grew, the volume steadily increased. In 1986, the JKAS shifted to an English-only publication, as the KAS started a new publication called The Publication of the Korean Astronomical Society (PKAS) which published articles written in either English or Korean. The frequency of publication was increased to twice a year in 1989, with the new design of the cover. The paper size of the journal has also changed from B5 to A4. The number of papers in JKAS increased steadily, and reached its local maximum in 1997, thanks to the increasing size of the community as well as improvement of research environment in general. However, after 1997 the number of JKAS papers has decreased, while the number of papers published in internationally recognized journals such as Astrophysical Journal, Astronomical Journal, Monthly Notices of Royal Astronomical Society, and Astronomy & Astrophysics by members of the KAS has been increasing very rapidly. JKAS is trying to raise its reputation again by internationalizing itself and by giving better service to authors.
This journal endeavors to publish significant research of broad interests in pure and applied mathematics. To be published in the journal, a paper must be correct, new, nontrivial, and significant, Journal Editors encourage publication of papers of length exceeding 10 published pages.
The Journal of the Korean Physical Society is an international journal published by the Korean Physical Society. It is dedicated to disseminating and publishing significant and original research results in all branches of physics, including condensed matter physics, atomic and molecular physics, nuclear physics, elementary particle physics, optics, fluid and plasma physics, statistical physics and interdisciplinary physics, thereby contributing to the development of physics. It publishes regular papers, letters, brief reports, comments and invited review papers contributed from all over the world. It also publishes special issues devoted to current research in a particular area of physics.

Molecular & Cellular Toxicology publishes original research and reviews in all areas of the complex interaction between the cell’s genome (the sum of all genes within the chromosome), chemicals in the environment, and disease. Acceptable manuscripts are the ones that deal with some topics of environmental contaminants, including those that lie in the domains of analytical chemistry, biochemistry, pharmacology and toxicology with the aspects of molecular and cellular levels. Emphasis will be placed on toxic effects observed at relevant genomics and proteomics, which have direct impact on drug development, environment health, food safety, preventive medicine, and forensic medicine. The journal is committed to rapid peer review to ensure the publication of highest quality original research and timely news and review articles.
Molecules and Cells (Mol. Cells) is an international journal devoted to the advancement and dissemination of fundamental knowledge concerning the molecular biology of cells. Papers on a broad range of topics of general interest to molecular and cell biologists are published. The journal will not publish paper that simply reports the cloning and sequencing of a gene or the preliminary X-ray crystallography without providing evidence for its biological significance. It is published monthly by the Korean Society for Molecular and Cellular Biology (KSMCB) and distributed by Springer. Copyright of the Mol. Cells is reserved KSMCB. This journal is published in part by financial assistance from the Korean Federation of Science and Technology Societies.

Mycobiology is an international journal devoted to the publication of fundamental and applied investigations on all aspects of Mycology and their traditional allies. It is published quarterly and is the official publication of the Korean Society of Mycology. Mycobiology publishes reports of basic research on fungi and fungus-like organisms, including yeasts, filamentous fungi, lichen fungi, oomycetes, moulds, and mushroom. Topics also include molecular and cellular biology, biochemistry, metabolism, developmental biology, environmental mycology, evolution, ecology, taxonomy and systematics, genetics/genomics, fungal pathogen and disease control, physiology, and industrial biotechnology using fungi.

Nutrition Research and Practice (NRP) is the official journal, jointly published by the Korean Nutrition Society and the Korean Society of Community Nutrition in 2007. The Journal was initially published quarterly, and then bimonthly, with six issues a year in 2010. NRP aims to stimulate research and practice across broad areas of human nutrition. The Journal publishes peer-reviewed original manuscripts on nutrition biochemistry and metabolism, community nutrition, nutrition and disease management, nutritional epidemiology, nutrition education and institutional foodservice in the following categories: Original Research, Research Notes, Communications, and Reviews. Reviews will be received by invitation of the editors only. Statements made and opinions expressed in the manuscripts published in this Journal represent the views of authors and do not necessarily reflect the position of the Societies.

GLOSSARY

Journal official title
The primary title of the journal should be shown on the cover page and masthead. This is the full name of the journal.

Journal abbreviated title
The journal title abbreviation should follow the ISO abbreviation standard.

pISSN and eISSN
The pISSN is the International Standard Serial Number of the print version, while the eISSN is that of the electronic version. These can be obtained from National Library of the corresponding country.

Digital Object Identifier prefix
Digital Object Identifier (DOI®) is for identifying content objects in a digital environment. A DOI (http://www.doi.org) is assigned to any entity for use on digital networks. To receive the DOI prefix, a journal publisher should contact CrossRef (http://crossref.org). However, in Korea, the Korean Association of Medical Journal Editors (KAMJE, http://kamje.kr) and Korean Institute of Science and Technology Information (KISTI, http://kisti.re.kr) work as affiliated member organizations for each journal publisher. If the DOI is provided through one of these two organizations, there is no need for each publisher to pay an annual membership fee. If the journal’s scope is biomedicine, KAMJE should be contacted; otherwise, KISTI should be contacted.

URL address of journal website
The Uniform Resource Locator (URL) address is usually disclosed on the cover page of the journal. It should also be listed on the masthead.

Aims and scope
There are unique aims and a scope for each specific journal. These should be written on the masthead.

SCI category
The subject category of a science, technology and medicine journal is followed by the SCI category classified by Thomson Reuters®.

**KOFST category**
Member societies of the Korean Federation of Science and Technology Societies (KOFST) are each from one of five major fields as follows: natural science, engineering science, agricultural and fisheries science, medical health science, and multi-disciplinary science.

**Launch year**
The first year of journal publication is important historical information.

**Journal title change history**
There may be journal title changes because of changes in the aims and scope, change of language, etc.

**Frequency**
This is the interval of publication. Usually there are monthly, bimonthly, quarterly, three times a year, biannually, annually and publication date-based schedules for online only journals.

**Language**
This means a language of the full text. English or Korean is common in Korea. If both languages are accepted, it is counted as Korean.

**Open Access**
To announce the journal as Open Access, the license statement should be described in each article as follows:

This is an Open Access article distributed under the terms of the Creative Commons Attribution Non-Commercial License (http://creativecommons.org/licenses/by-nc/3.0/) which permits unrestricted non-commercial use, distribution, and reproduction in any medium, provided the original work is properly cited.

Also, the article should be archived in institutional repositories such as KoreaMed Synapse, KoreaScience, or PubMed Central. Open Access is not identical to free access. For more information about Open Access journal, see http://www.nebi.nlm.nih.gov/pmc/tools/openflist/.

**Permanence of paper/Acid free paper**
All journal paper used for journal printing is acid-free paper. This should be written on the masthead as follows:

It is printed on acid-free paper.

Permanence of paper means that it is believed that it can be preserved for at least 100 years. To declare the permanence of paper, it should meet the following requirements:

If the paper meets the requirements, the following information should be included:

- This paper meets the requirements of ANSI/NISO Z.39.48-1992 (Permanence of Paper).

or

Databases indexed

There are international indexing databases such as Web of Science, Scopus, PubMed, BioSIS Previews, CAS, CINAHL, Engineering Index, Agricola, etc. If the journal is indexed in any databases, it is recommended that this be indicated on the masthead.

Masthead

On the masthead, the information unique to each journal should be described. The information from the masthead may be a good resource when the journal’s quality is evaluated.

Editor and his/her affiliation

The editor’s reputation may influence the reputation of the journal. The editor should be listed along with the editorial board members.

Manuscript editor and his/her affiliation

The manuscript editor is an editor who specializes in maintaining an exact and standardized style and format for manuscripts. Also, the logic of the manuscript is checked. Listing a manuscript editor shows that the journal’s style and format is properly managed.
Publisher and its address, fax and telephone number, and email address
With this information, readers can ask for subscriptions and can request permission to use paper content from the journal.

Printing company and its address
Since STM journal publishers in Korea are usually societies or non-profit institutes, the printing and binding is done by printing companies. Clients can evaluate commercial printing companies by reviewing the layout or color quality of their journal publications.

Korean Journal of Physiology & Pharmacology  107
Korean Journal of Radiology  108
Korean Journal of Systematic Zoology  140
Korean Journal of Urology  109
KSCE Journal of Civil Engineering  61
KSII Transactions on Internet and Information Systems  62

M
Macromolecular Research  63
Metals and Materials International  64
Molecular & Cellular Toxicology  141
Molecules and Cells  142
Mycobiology  143

N
Natural Product Sciences  110
Nuclear Engineering and Technology  65
Nutrition Research and Practice  144

O
Oriental Pharmacy and Experimental Medicine  111
P
Plant Biotechnology Reports  31
Plant Pathology Journal  32
Polymer Korea  66
Psychiatry Investigation  112
Pure and Applied Mathematics  145

S
Smart Structures and Systems: An International Journal  67
Structural Engineering and Mechanics, An International Journal  68

T
Tissue Engineering and Regenerative Medicine  69
Transactions on Electrical and Electronic Materials  70

W
Wind & Structures: An International Journal  71

Y
Yonsei Medical Journal  113

</table>
Molecules and Cells  142

**Chemistry, Medicinal**
Journal of Medicinal Food  27
Archives of Pharmacal Research  75
Natural Product Sciences  110

**Chemistry, Multidisciplinary**
Journal of Industrial and Engineering Chemistry  53
Bulletin of the Korean Chemical Society  120

**Clinical Neurology**
Journal of Clinical Neurology  87
Journal of Korean Neurosurgical Society  92
Journal of Neurogastroenterology and Motility  93
The Korean Journal of Pain  104

**Computer Science, Artificial Intelligence**
International Journal of Fuzzy Logic and Intelligent Systems  44

**Computer Science, Information Systems**
International Journal of Contents  42
Journal of Communications and Networks  50
Journal of Computing Science and Engineering  51
Journal of Information Processing Systems  54
KSII Transactions on Internet and Information Systems  62

**Computer Science, Interdisciplinary Applications**
Genomics & Informatics  127
International Journal of Maritime Information and Communication Sciences  45

**Construction & Building Technology**
International Journal of Steel Structures  48
Smart Structures and Systems  67
Structural Engineering and Mechanics, An International Journal  68
Wind and Structures, An International Journal  71

**Dentistry, Oral Surgery & Medicine**
Journal of Advanced Prosthodontics  85
Journal of Periodontal & Implant Science  94
Korean Journal of Orthodontics  103

**Dermatology**
Annals of Dermatology  74

**Ecology**
Journal of Ecology and Field Biology  130

**Endocrinology & Metabolism**
Korean Diabetes Journal  98

**Engineering, Aerospace**
International Journal of Aeronautical and Space Sciences  39

**Engineering, Biomedical**
Biotechnology and Bioprocess Engineering  33

**Engineering, Chemical**
Journal of Industrial and Engineering Chemistry  53
Korean Journal of Chemical Engineering  60

**Engineering, Civil**
International Journal of Steel Structures  48
KSCE Journal of Civil Engineering  61
Engineering, Electrical & Electronic
ETRI Journal 36
Journal of Electrical Engineering & Technology 52
Journal of Power Electronics 56
Journal of Semiconductor Technology and Science 57
Journal of the Korean Institute of Electromagnetic Engineering and Science 58
Transactions on Electrical and Electronic Materials 70
Journal of Magnetics 131

Engineering, Environmental
Environmental Engineering Research 35

Engineering, Industrial
Industrial Engineering & Management Systems 38

Engineering, Marine
International Journal of Maritime Information and Communication Sciences 45
International Journal of Naval Architecture and Ocean Engineering 46

Engineering, Mechanical
International Journal of Air-Conditioning and Refrigeration 40
International Journal of Automotive Technology 41
Journal of Mechanical Science and Technology 85
International Journal of Precision Engineering and Manufacturing 47

Entomology
Journal of Asia-Pacific Entomology 25
Entomological Research 124

Evolutionary Biology
Korean Journal of Systematic Zoology 140

Fisheries
Fisheries and Aquatic Sciences 37

Food Science & Technology
Food Science and Biotechnology 23
Journal of Medicinal Food 27
Korean Journal for Food Science of Animal Resources 29
Journal of the Korean Society for Applied Biological Chemistry 28

Gastroenterology & Hepatology
Gut and Liver 81
Journal of Neurogastroenterology and Motility 93

Genetics & Heredity
Genes & Genomics 126
Genomics & Informatics 127

Geosciences, Multidisciplinary
Geosciences Journal 128
Journal of Astronomy and Space Sciences 129

Horticulture
Horticulture, Environment, and Biotechnology 24
Korean Journal of Horticultural Science & Technology 30

Immunology
Mycobiology 143

Neurosciences
Journal of Neurogastroenterology and Motility 93
Korean Journal of Pain 104

Nuclear Science & Technology
Nuclear Engineering and Technology 65

Nursing
Asian Nursing Research 76
Journal of Korean Academy of Nursing 90

Nutrition & Dietetics
Nutrition Research and Practice 144
Journal of Medicinal Food 27

Obstetrics & Gynecology
Journal of Gynecologic Oncology 89

Oncology
Cancer Research and Treatment 78
Journal of Breast Cancer 86
Journal of Gynecologic Oncology 89

Ophthalmology
Korean Journal of Ophthalmology 102

Optics
Journal of the Optical Society of Korea 139

Orthopedics
Clinics in Orthopedic Surgery 80

Otorhinolaryngology
Clinical and Experimental

Parasitology
Korean Journal of Parasitology 105

Pathology
Korean Journal of Pathology 106

Pharmacology & Pharmacy
Archives of Pharmacal Research 75
Biomolecules & Therapeutics 77
Journal of Ginseng Research 88
Natural Product Sciences 110
Korean Journal of Physiology & Pharmacology 107

Physics, Applied
Current Applied Physics 123

Physics, Condensed Matter
Journal of Semiconductor Technology and Science 57
Carbon Letters 122
International Journal of Precision Engineering and Manufacturing 47

Physics, Multidisciplinary
Journal of the Korean Physical Society 138

Physiology
Korean Journal of Physiology & Pharmacology 107

Plant Sciences
Plant Biotechnology Reports 31
Plant Pathology Journal 32
Journal of Plant Biology 134
Natural Product Sciences 110

**Polymer Science**
- Korea-Australia Rheology Journal 59
- Polymer Korea 66
- Fibers and Polymers 37
- Macromolecular Research 63

**Radiology, Nuclear Medicine & Medical Imaging**
- Korean Journal of Radiology 108

**Remote Sensing**
- Journal of the Korean Institute of Electromagnetic Engineering and Science 58

**Statistics & Probability**
- Journal of the Korean Statistical Society 138

**Surgery**
- Journal of Korean Neurosurgical Society 92
- Journal of the Korean Surgical Society 95

**Telecommunications**
- Journal of Communications and Networks 50
- KSII Transactions on Internet and Information Systems 62

**Thermodynamics**
- International Journal of Air-Conditioning and Refrigeration 40

**Tissue Engineering**
- Tissue Engineering and Regenerative Medicine 69

**Toxicology**
- Molecular & Cellular Toxicology 141

**Transportation Science and Technology**
- International Journal of Automotive Technology 41

**Urology & Nephrology**
- Korean Journal of Urology 109

**Veterinary Sciences**
- Journal of Veterinary Science 96

**Zoology**
- Korean Journal of Systematic Zoology 140
